COMMERCIAL RETROSPECT.—Oct. 10.

There has been little improvement in the demand for Colonial produce by private contract during the past week, and the public sales have been very limited. The principal portion of the business done has been to supply the immediate wants of the home trade. The demand from the shippers is to a trifling extent only, the prices of most articles being too high to induce them to purchase largely at present. The imports from all parts of the globe have been less extensive than for several weeks past, and the exports continue light.

The Money Market has enjoyed much quietness, and the occasional good prices of the previous week have been the general prices of last. From the peninsula we have had no

advices of any influential character, and a calm has succeeded the late agitation in the market for Public Securities. A knowledge of the fact of the money for the first instalment of the dividends on Spanish Bonds in November being ready, has propped the quotations of Spanish Bonds, which may be said to have fluctuated between 26 and 27, which are very steady prices; on Saturday they were 25½, and 25½ to-day. The long sighted ones augur that one great reason why Mendizabel has got the money ready for the dividends is, that he will want a new loan, and this impression will in all probability prevent Spanish from getting up very high. During the time of Ferdinand they were as low as 13 14, and since that time they have been 52½, now they are 26 27, that is double their lowest price and half their highest price.

Portuguese Securities have fluctuated with Spanish between 51 and 52, but they do not excite so much interest as Spanish, neither are the transactions in them so extensive; on Saturday they were 51, and 50½ 51½ to-day.

In other Foreign Securities the fluctuations have been trifling, and nothing has presented matter for public remark. Money has been scarce in London, and it is understood that the recent Monetary movements in the metropolis are now beginning to be felt in the provinces. The complaint which was recently so bad at the heart is now felt at the extremities. In the City, Banker's Bills have been done at 5 per cent, which certainly does not show that Money is much easier. The English Money Market has been steady, and prices generally good. Consols have varied very little from 89 one way or the other; on Saturday they went down to 88½, and 88½ to-day.—Exchequer Bills declined on Friday, and were quoted at one discount to par for the 1½ and six prem. for the two-penny.—India Bonds have been done at 11 premium.

We have had a considerable number of arrivals of vessels reported at Lloyd's last week.

In 1835 the cargoes of goods imported into Manila amounted to 1,227,228 dollars. The value of the cargoes of exports for the same time amounted to 1,37,661 dollars. This remote settlement consumes a considerable quantity of British manufactures.

Accounts from Macao state that a proclamation had been issued by the Senate there, that from and after the 1st of March last, until the expiration of twelve months, European goods, produce and manufactures imported by vessels of every nation will be admitted to entrepot for exportation to Canton or seaward, on paying a duty of 1½ per cent. upon their nett invoice value, together with a moderate charge for go-down rent, and coolie hire. Bonded goods will not be permitted to remain in the government warehouses for longer than six months, but may be lodged in private go-downs upon the owners or agents giving security that the entrepot regulations shall be strictly complied with, as well for the payment of duties and other expenses.

SILK.—The market for all kinds of Silk, both East India and Italian, continues dull; the trade only take sufficient to supply immediate wants, so which late prices have been paid: were the holders, however, to press sales, a reduction must be submitted to.

WOOL.—The trade remains in a dull state; a large quantity of German is pressing upon the market, purchases of which can be made at a reduction on late prices of 2d per lb, but without leading to any business of moment. Spanish is still scarce, and held for former prices. The next public sales are expected to take place about the latter end of the ensuing month. Some arrivals are daily expected from New South Wales and Van Dieman's Land.

ROCHDALE FLANNEL MARKET, OCT. 3.—The market has been more than usually brisk. Pieces of every quality have been eagerly sought after, and readily bought up. Though the demand has been great, however, the prices have remained stationary. Wool has been rather heavy on account of buyers thinking that its price is now at the highest, and that the market must soon give way.

YORKSHIRE.—At Leeds last week business in both halls was duller than it has been for some time past. There has been a trifling reduction on goods of low quality, on finer qualities prices remain firm. The stocks on hand are light. Business in the warehouses continues pretty good. At Bradford market yesterday week there was no alteration. The manufacturers only purchase yarn to meet their immediate wants, in expectation of lower prices. The spinners are, however, busy on orders for export. Very little was done in the Wool market. Rather less business was done at Huddersfield. At Halifax there was not quite so much demand for stuff goods, but prices remained the same. In the Wool market business has been flat, both at Bradford, Halifax, and York.

OLDHAM.—The hating trade at Oldham, for some time back has been unusually dull, and not more than half the usual number of hands are employed. Owing to this stagnation in trade some of the masters have reduced the men's wages. Meetings have been held every night for a week past, the result of which is expected to be a turn-out.—Oct. 11.

Smuggling of French Brandy into this Country sanctioned by the French Government.

From a letter in the "Constitutional" (English Paper) of Wednesday last, it appears that there is a very extensive smuggling of French Brandy into this country, and that under the countenance or permission of the French Government. The writer states the case thus, his object in making the thing known is the protection of the fair trader. In France there are eight or ten privileged ports—into these privileged ports British vessels may enter free of duty, and without proper papers. These vessels, says the writer, leave these privileged ports with large quantities of French Brandy to be imported into this country without payment of duty. He states, that he has lived in these privileged ports, and that the quantity of such Brandy shipped for this country would not be over-rated at 1,000,000 gallons per annum! In some years, he states, that it has been calculated to double that amount. He allows that an eighth of the million may be lost on the road, and another eighth seized by the Custom House officers here, and calculates that the remaining 800,000 gallons reach different parts of this country, and come into consumption. If this be correct, and the writer speaks like a man who is certain of the truth of his statement, well may the regular Brandy trade in this country be so languid—these contraband traders paying no duty, and the regular trader paying 22s per gallon.

We are not advocating the present high duty on Brandy, but as long as it is a duty, all importers ought to be made equally to pay it. But it is to be remembered that such very high duties present great temptations to smuggling—they make it worth the while of the smugglers to run all risk—and smuggling will always continue, like every thing else, in proportion to the temptations which there are to stimulate it.

The writer of the letter referred to, does not touch on this point, which we think very material, as far as devising a cure for smuggling is concerned—do away with the temptation and you do away with the sin.

As far as France is concerned, he seriously proposes to our government that they ought to urge the abolition of all privileged ports in France; and that in every French port the same rules should be observed with our vessels as are observed in all our ports to French vessels.—Oct. 3.

COLONIAL OFFICE,

Cape Town, 25th January 1837.

The following Notices are published for general information, at the request of His Excellency the Governor of New South Wales:—

Notice to Mariners.

NEW SOUTH WALES.

Harbour Master's Office, Sydney, 22d August 1836.

NOTICE is hereby given, that a Floating Light is now placed near the Rocks called the Sow-and-Pigs within the Heads of Port Jackson. It is moored in 22 feet (low water spring tide) at the distance of 190 yards N. W. (by compass) from the Beacon on the dry part of the Sowt and-Pigs shoal, and at about 60 yards outside of a rock detached from the shoal, in the direction of the Beacon, over which there is only 7 feet water, and will exhibit Two Lights placed one over the other.

DIRECTIONS FOR ENTERING.

With a Southerly Wind—Being at ¼ or ½ of a mile from the shore under the Light House, steer N. W. until the Light Vessel is seen over the extremity of the inner South Head, then haul up to W. N. W. until it bears S. W., which will lead clear of the inner South Head; haul to the wind keeping the Light Vessel on the larboard bow, pass her on the larboard hand, and in turning to windward between the shoal and the land, come no nearer the former than to bring the flat-roofed house (being the 3d to the right or [to the Westward of the Windmills] in sight over the bluff of Point Bradley. When the Light House Bears S. E. by E. ¼ E. a ship is to the Southward of the shoal. Another mark for having passed the shoal is the rock called the "Bottle and Glass," under a conspicuous road on the hill. By night, the mark for turning up the channel, between the Sow-and-Pigs and the shore, is to keep the Light Vessel to the East of N. E. ¼ N.; but, on approaching George's Head, vessels should stand no nearer the 3 Fathom Knowl than to get the Light to bear N. E., until the Light House bears S. E. by E. ¼ E.

The least water on the Knowl is 16 feet at low water.

With a fair Wind.—Enter as before directed, pass the Light Vessel as close as convenient, and steer towards George's Head until the westernmost Windmill is over the bluff of Bradley Point. This mark will lead over the deepest channel. In entering by night, after passing the Light Vessel, steer S. W. ¼ W. until beyond the line of bearing, between the Light House and George's Head, or until the former bears S. E. by E. ¼ E.

BY HIS EXCELLENCY MAJOR GENERAL

WHEREAS under and by virtue of the Provisions of an Ordinance, entitled "An Ordinance for the Erection of Municipal Boards in the Towns and Villages of this Colony, on which the Local Regulations of each shall be founded," a Meeting of Resident Householders was duly called, constituted, and held at Beaufort, on the 9th and 10th days of December last, and certain Municipal Regulations were duly adopted at such Meeting, and were forthwith transmitted to me for my approval, amendment, or disallowance, by and with the advice of the Executive Council; and whereas the said Regulations have been amended by me, by and with the advice of the Executive Council, and transmitted to the Chairman of the said Meeting; and whereas at a subsequent Meeting of such Resident Householders as aforesaid, duly called, constituted, and held at Beaufort, on the 19th day of January last, it was decided, by majority of votes, that the said Regulations so amended as aforesaid should be adopted, and which adoption the Chairman of the said last-mentioned Meeting hath duly communicated to me: I do, therefore, under and by virtue of, and in conformity with, the Provisions of the said Ordinance, proclaim and make known, that the Regulations aforesaid, so amended as aforesaid, have been so adopted as aforesaid; and which said Regulations I have caused to be published in the *Government Gazette* of this date.

GOD SAVE THE KING!

REGULATIONS OF THE MUNICIPALITY OF BEAUFORT.

1. The Town of Beaufort, and the Common Pasture Lands belonging thereto, in their present or future extent, shall form the Municipality.
2. The Municipality shall form one Ward, for which one Wardmaster shall be appointed by the Commissioners to be hereafter elected, in terms of the Ordinance No. 9, 1836, if they should see fit.
3. There shall be three Commissioners elected for the Municipality.
4. The Immoveable Property in the Municipality shall be valued by two persons, to be annually appointed by the said Commissioners for that purpose, and who shall, on their being so appointed, take an oath, to make such valuation fairly and honestly, to the best of their ability, with power to them, in case of a difference of opinion, to choose an umpire, whose decision shall be final.
5. The said Commissioners shall meet, for the despatch of business, on the first Monday of every month, at 10 o'clock in the forenoon.
6. The said Commissioners shall appoint a Treasurer, Water-overseer, Clerk of the Market, Overseer of the Common Pasture Lands, and Town Assizer, with power to unite as many of these offices, and with such salaries, as they shall deem expedient.
7. The said Commissioners shall, so soon as the Funds of the Municipality shall admit of it, and it shall otherwise

appear to them expedient, appoint and employ the Watchmen and others specified in the 31st Section of the aforesaid Ordinance No. 9, 1836, or such of them as they shall see fit, and shall perform all other matters and things provided to be done by them in the said 31st Section of the said Ordinance No. 9, 1836.

8. The Commissioners shall, so soon as the Funds of the Municipality shall admit of it, and it shall otherwise appear to them expedient, provide and carry, and lay a pipe or pipes, for the conveyance of water, and shall make regulations touching the supply thereof, as specified in the 35th Section of the said Ordinance No. 9, 1836.

9. The Commissioners shall, when it shall appear to them expedient, cause to be made, provided, erected, and built, such bridges, sluices, dams, reservoirs, water-courses, pumps, wells, fountains, drains, and ditches, and shall make such alterations in the same, as they shall deem necessary, and shall cause the same, and the banks of the Rivers, to be kept at all times in good and sufficient order and repair.

10. No proprietor or occupier of an Erf, or part of an Erf, entitled to a supply of water, for the purpose of irrigation, shall lead any water out of the common water-course, except at a double sluice, of the same dimensions as the present public sluices, and to be properly erected at such part of the said Erf, or part of an Erf, as the proprietor or occupier may think fit, and which shall have been approved of in writing by a quorum of the said Commissioners, under a penalty of 5s. for each offence.

11. Every proprietor or occupier of an Erf, or part of an Erf, selling or letting any part thereof, with the right to a supply of water for irrigation, shall give notice to the said Commissioners of his having done so. And, until such notice be given, or the sale or hire be proved by the purchaser or lessee, to the satisfaction of the said Commissioners, his right to any part of the water, to which the said Erf shall be entitled, shall not be recognized by the said Commissioners.

12. On receiving such notice, or on being so satisfied, the said Commissioners shall immediately apportion to the said Purchaser or Lessee, the supply of water to which he may appear to be entitled.

13. The supply of water shall be regulated according to the distribution thereof made by the late Deputy Landdrost and Heemraaden of the District of Beaufort, except in so far as the same is altered by any of these Regulations, which distribution shall remain in force, until altered in whole or in part, by the said Commissioners.

14. No person shall turn, or cause to be turned away, any part of the water allotted to any Erf, or part of an Erf, to which such person shall not have right, and shall not, in any way, hinder the run, or diminish the quantity thereof, either by the leaky state of his sluice, or otherwise, under a penalty not exceeding £3, and not less than 5s. sterling, for each offence. And, in case of any such leakage, or hindrance, or diminution, being discovered, the proprietor or occupier of the ground, where the same shall happen, shall be held responsible for the same, unless he can show that it was caused without his knowledge or approbation, by some person or persons not belonging to his family, nor in his service, and over whom he had no control.

15. Every proprietor or occupier of an Erf, or part of an Erf, may use or dispose of the water allotted to him for such Erf, or part of an Erf, in any way that he may think fit, provided that he do not thereby cause any loss or damage to any other person.

16. The Erven Nos. 37, 38, and 53, shall be entitled respectively to all the water, commonly called "Afloop Water."

17. So soon as the time allotted to each Erf, or part of an Erf, for irrigation, shall have elapsed, the proprietor or occupier thereof, shall turn, or cause the water to be turned away into the common water-course, under a penalty, in case of failure, of not more than £3, nor less than 5s. sterling.

18. No person shall use any violence to, or injure, or in any way interfere with, the sluices or water-courses of any person, under a penalty not exceeding £2, for each offence.

19. No person shall make any hole in the streets, or any ditch or water-course, beside the common water-course, nor shall turn the water out of the same, nor shall make any way, road, or path, through the same, on the upper side of the town, under a penalty not exceeding £1, nor less than 5s. sterling.

20. All horses, cattle, sheep, or goats, or other animals, found grazing in the streets, or within five yards of the dams or water-courses, shall be impounded, and shall not be released, till after payment of the usual pound charges.

21. Any person who shall have in his possession any private key, for the purpose of opening any cock, or who shall, in any manner, clandestinely appropriate to his use,

any water from the public fountains or pipes, by means of an private pipe, shall forfeit a sum not exceeding £20, nor less than £5 sterling. And any person, who shall open, or leave open, any cock of any public fountain or pump, so that the water shall or may run in waste, shall forfeit a sum not exceeding £2, nor less than 5s. sterling. And any person, who shall wash any clothes at or near any public fountain or pump, shall forfeit a sum not exceeding £1, nor less than 5s. sterling.

22. Any person who shall bathe or wash in, or cast any filth or rubbish into any public dam, water-course, sewer, or canal, or in any other way willingly render the water therein dirty, shall forfeit a sum not exceeding £2, nor less than £1 sterling.

23. Any person, whose ducks, geese, or other waterfowl, shall be found in any common watercourse or dam, or dirtying the water therein, shall, for each time, forfeit the sum of 1s. sterling.

24. The said Commissioners shall take all possible care that no injury be occasioned to the dams or springs, or the water therein, by horses, cattle, sheep, or goats, drinking thereat.

25. The said Commissioners shall have full power to allow such part of the water, unappropriated to private individuals, as they may think fit, to escape from the Gamka and Kuils River Dams, for the purpose of washing.

26. No person, while rain water is running in the common watercourse, shall prevent or hinder the same from running, by shutting his sluice or otherwise; even although it should be during the time allotted to him for irrigation, except in that case, with the consent of the water-overseer. But every person shall be entitled to open one sluice leading from the common watercourse to his ground, and may use the water which shall run through the same, provided, however, that he immediately shut it, on being thereto required by the water-overseer.

27. Every proprietor or occupier of an Erf, or part of an Erf, shall pay to the said Commissioners, on the 1st day of January in each year, for every two hours and a half of double water (that is water of the Gamka and Kuils River Springs, united) and for every five hours of single water, either of the Gamka or Kuils River Springs, allotted to him, the sum of 9s. sterling, and so in proportion for any greater or less quantity. And the proprietors or occupiers of the Erven, Nos. 37 and 53, shall pay respectively to the said Commissioners, on the 1st day of January in each year, the sum of 9s. sterling, and of Erf, No. 38, the sum of 6s. sterling, in consideration of the "afloop" water herein before allotted to them. And every householder, not paying water-tax, as above mentioned, shall pay to the said Commissioners, on the 1st day of January in each year, the sum of 2s. sterling, as water-tax, all such payments, to commence on the 1st day of January 1837. And every brickmaker shall pay to the water-overseer, the sum of three-pence sterling, for each hour of double water that shall be allotted to him for brickmaking; such payment to be made at the time of his making application to the said water-overseer, for the said water. And the said water-overseer shall, on the 1st day of every month, account for, and pay over to the Treasurer, all sums of money so received by him.

28. No person shall walk on the banks or on the masonry of the watercourses or dams, so as to injure the same, under a penalty of 5s. for each offence.

29. No person shall chop, cut, or in any way injure or destroy any trees or bushes growing on the banks of the rivers, dams, and watercourses next the town, and useful in strengthening the same, nor in any way injure the said banks or beds of the rivers, under a penalty of not more than £1, and not less than 5s. sterling, for each offence; and if the same be done with the intention of injuring such banks, under a penalty of £2 sterling.

30. The said Commissioners shall cause all public streets, roads, and places, to be at all times kept in good and sufficient repair, and as occasion shall appear to them to require, shall cause such new streets and roads to be made, as may be legally made, and shall appear to them to be necessary for the public use, and to be kept at all times in like good and sufficient repair.

31. Any person, who shall cast any filth, soil, earth, or rubbish, into any street or public place, or waste ground, without permission of the said Commissioners, shall be bound to pay the cost of removing the same, and shall forfeit the sum of £2 sterling.

32. All private avenues, passages, yards, and ways, shall be kept clear by the proprietors or occupiers thereof, so as not to become a public nuisance, by offensive smell or otherwise, under a penalty not exceeding £2 sterling.

33. No carriage, wagon, or cart, shall be kept or permitted to remain in any street, way, or avenue, after dusk

in the evening, upon any pretence whatever, for any longer period than one night, except in such places as shall be hereafter appointed by the said Commissioners. And the owner, or person in charge thereof, shall forfeit, for every such offence, a sum not exceeding £1, nor less than 5s. sterling.

34. No wagon, or other carriage, shall, for the purpose of loading, unloading, or otherwise, be permitted to obstruct the passage of any street, nor any two carriages, wagons, or carts, be permitted to stand abreast, in any street, way, or avenue, except in the places above referred to; and the owner, or person in charge thereof, not removing the same immediately, shall forfeit a sum not exceeding £1, nor less than 5s. sterling.

35. No wagon or cart drawn by bullocks, or by more than six horses or mules, shall be, for any purpose, in any street, way, avenue, or public place, in the town of Beaufort, without a person at the head of the said bullocks, horses, or mules, as leader, when the same shall be in motion. And every carriage, wagon, or cart, whether drawn by bullocks, horses, or mules, shall, when stationary, have a person to take care of the same,—under a penalty not exceeding £1, nor less than 5s. sterling, to be paid by the owner of such carriage, wagon, or cart.

36. It shall be lawful for the said Commissioners, or any person acting under their orders, or by their authority, or for any Police Officer or Constable, to have all such carriages, wagons, or carts, removed or detained, for the purpose of being impounded, until the offender shall have been dealt with according to law.

37. Every person, who is about to build or repair any house or building, whereby any street or highway may be necessarily encumbered, shall give notice thereof, to the said Commissioners, who shall give such directions relative thereto, as the nature of the case and the public convenience shall require. And, during the continuance of any such encumbrance, the owner of the house or building shall keep proper lights burning thereat, during the night, when thereto required, and in all things, conform to the directions of the said Commissioners, in that respect, under a penalty not exceeding £10, nor less than £1 sterling.

38. Any person, who shall, wilfully or negligently, allow any horses, cattle, sheep, goats, or hogs, to stray in any street or public place, in the town of Beaufort, shall forfeit a sum not exceeding £2, nor less than 1s. sterling; and any such animal being so found straying, shall and may lawfully be impounded, by any person finding the same, and shall not, in such case, be released, until the said fine and all pound dues, costs, and charges for keeping the same be paid. And any such animal being impounded, and not released within 14 days after advertisement thereof, together with its description, to be affixed to some public place within the limits of the Municipality, shall be sold, by public auction, to the highest bidder; and the money arising therefrom, shall go and be applied, in the first instance, to pay the said fine, poundage dues, and necessary expenses; and the remainder, if any, shall be paid into the hands of the said Treasurer, for such person as shall eventually be proved to be entitled to the same.

39. Every proprietor or occupier of an Erf, or part of an Erf, shall plant trees of such kinds as shall be approved of by the said Commissioners, in the street, in front of his ground, at a distance of 15 feet from each other, and 12 feet from his wall or boundary line, with the exception of the Erven A, B, C, D, 29, and 49, before which the trees shall be planted at a distance of six feet from the walls or boundary lines, under a penalty of 1s. sterling, for each tree that may have been neglected to be planted, or to be properly attended to, after having been planted. This Regulation shall take effect from and after the 1st day of October 1-37, and shall be in force for that and every planting season thereafter, which shall be held to end on 30th day of September in each year. And it shall be the duty of every such proprietor or occupier, to prove that the said trees were such as might reasonably be expected to grow, and were properly planted and attended to.

40. No person shall allow any firewood or timber to lie in the streets, or other public place, under a penalty of 5s. for each day that the same may so lie. And it shall be lawful for the said Commissioners, or for any person acting under them, or by their authority, and for any Police Officer or Constable, on the refusal or neglect of the owner thereof, to have the same removed, and to pay the penalty incurred by him, to have all such firewood or timber removed or detained, for the purpose of being impounded, until the offender shall have been dealt with according to law.

41. No horses, oxen, or cows, shall be tied up in the streets or other public place, with the exception of the Market-place, under a penalty of 5s. for each offence. And all horses, oxen, and cows, found so tied up, shall be impounded, and dealt with in the manner prescribed by the 38th Section of these Regulations.

42. All damage occasioned to any person, by any horses, cattle, sheep, goats, or other animals, shall be estimated by the Wardmaster, or by any other person appointed for that purpose by the said Commissioners. And such appraiser shall grant a certificate to the owner of such property, to be sent to the Pound-master, in case the horses, cattle, sheep, goats, or other animals, occasioning such damage, shall have been impounded, who shall recover the amount thereof, together with the sum of 2s. 6d., as the expense of such appraisal and certificate, in the usual manner. And in case the person to whom such damage has been caused, or the person by whose horses, cattle, sheep, goats, or other animals, it has been occasioned, shall not be satisfied with the valuation made by the Wardmaster, or such other person as above mentioned, he shall be entitled to appeal therefrom, to any one of the said Commissioners, whose decision shall be final. And unless the person suffering such damage as aforesaid, shall comply with this Regulation, he shall not be entitled to recover anything whatever, in respect of such damage.

43. Any person who shall discharge any firearms without lawful cause, or let off any fireworks in any street, square, or lane, within one mile of the Market-place, or who shall discharge any firearms loaded with ball, without lawful cause, within one mile of the Market-place, shall forfeit a sum not exceeding £5, nor less than 10s. sterling.

44. A Market shall be established for the sale of cattle, poultry, vegetables, fruit, and the like, and other articles of colonial produce.

45. The Erf No. 26, shall be the Market-place.

46. The said Commissioners shall, when it shall seem to them expedient, cause suitable houses, kraals, or other buildings to be erected, and shall provide proper weights and measures, for the convenience of persons attending the market, and shall cause the same to be kept in good and sufficient repair.

47. The Market shall be under the superintendence of a Clerk of the Market, whose duty it shall be to pay particular attention to the wagons and produce which may be brought there, to prevent to the utmost of his power all underhand practices and irregularities, to conform to such orders as he may from time to time receive from the said Commissioners, and to conduct the business of the Market in strict accordance with the Regulations there for provided.

48. With the exception of Sundays, Sacrament Days, and Preparation and Thanksgiving Days, Good Friday, Ascension Day, Christmas Day, and New Year's Day, the Market shall be open for all wagons, carts, and other vehicles, arriving with Colonial produce, during the whole day. But the sales shall commence at 8 o'clock in the morning and 4 o'clock in the afternoon, and shall continue until the whole of the articles shall have been publicly offered for sale.

49. The proprietor or conductor of every wagon or other vehicle, on entering the market with produce, shall pay to the Clerk of the Market a registry fee of 4d. together with one per cent. on the amount of all goods and produce sold.

50. All sales in the market shall be for cash only. And the Clerk of the Market shall not, on any account, allow a departure from the rule. No arrangement made by the parties, for any particular mode of payment, previous to the exposure of the produce in the market, shall be recognized or admitted by the Clerk of the Market, who shall be responsible to the seller for the money for which the articles shall be sold. And all purchases shall be paid for by the buyer to the Clerk of the Market only, either on the spot, at the time of purchase, or within two hours after the produce shall have been sold in the market.

51. Any person failing to pay within the prescribed time, may be required by the Clerk of the Market, at any subsequent purchase he may be desirous of making, to deposit the money on the spot, and in the event of non-compliance, the next highest bidder shall be declared the purchaser.

52. Notice of all marketable articles bought by private contract must be given to the Clerk of the Market, at least 24 hours previous to their arrival in the town. All produce must, however, pass through the market before it is unloaded, for the purpose of being registered by the Clerk, for which the usual registry fee and market dues shall be paid.

53. Any person buying or selling within the Municipality, any produce or other marketable articles, brought there for sale, without their having been first exposed to sale on the market; and any buyer or seller, by private contract, of produce or other marketable articles, brought into the town, who shall neglect to give notice, or to cause the same to pass through the market, as specified in the foregoing section, shall each be liable to a penalty of 10s. for the first offence, £1 for the second, and £2 for the third offence. And it shall be lawful for the said Commissioners to cause all such articles, if they be found in the possession of the buyer or seller, to be taken to the market, there to be publicly sold, when the Clerk of the Market shall pay over to the proprietor the proceeds thereof, after deducting the penalty incurred by him, and the necessary expenses.

54. All vegetables, butter, poultry, firewood, and other petty articles of produce, not exceeding £1 in value, may be brought into the town, without passing through the market, or being registered, and sold in any manner that the proprietor may think fit.

55. All articles exposed for sale in the market shall be sold to the highest bidder, who shall not be compelled to take more than one muid of meal, flour, grain, or potatoes, 25 pounds of salted meat, tallow, soap, or dried fruits, or one half-aum of wine, brandy, or vinegar.

56. If any dispute should arise between two or more bidders, relative to the sale of any article, the same shall be forthwith again put up for sale.

57. Neither the Clerk of the Market nor any person employed by him shall be permitted to purchase produce in the market, for the purpose of trading therewith, or as the agent of any other person, on pain of being removed from his situation. But he may purchase in small quantities, articles, which are *bona fide* for his own family consumption.

58. The Clerk of the Market shall not be a store-keeper or shop-keeper, or in any way engaged in traffic.

59. The Clerk of the Market shall enter into a recognition, himself in £50, and two sureties in £25 each, to the satisfaction of the said Commissioners, and shall also take an oath, for the due performance of the duties of his office.

60. The seller shall be obliged to deliver the articles sold at the house of the buyer, within the Municipality, if no stipulation shall be made to the contrary.

61. The Clerk of the Market shall charge the following fees to the seller, for weighing and measuring the produce brought to the market:

to him by the said Commissioners. And all sums so received shall be paid over by him to the said Treasurer, together with the necessary accounts verified on oath, on the first day of every month.

64. The Commissioners shall enforce all Regulations which shall be made by them, for the due and proper care of the common pasture lands of the Municipality.

And they shall give due notice, by advertisement, to be affixed to some public place within the Municipality, for all persons using weights or measures, for the purpose of dealing, to attend the said courts. And any person, who, after such notice has been given, and after his weights and measures might have been assized accordingly, shall use in his trade or dealing, or have in his house, any weights or measures, which have not been assized, shall forfeit a sum not exceeding £5, nor less than £1 sterling.

72. There shall be paid to the said Commissioners, for every weight or measure assized or marked, the sum of three-pence, besides the costs of repair thereof, if such shall be necessary.

PROCLAMATION

BY HIS EXCELLENCY MAJOR GENERAL
SIR BENJAMIN D'URBAN,

Knight Commander of the Most Honorable Military Order of the Bath, of the Royal Guelphic Order of Hanover, and of the Royal Portuguese Military Order of the Tower and Sword, Colonel of His Majesty's 51st Regiment of Foot, Governor and Commander-in-Chief of His Majesty's Castle, Town, and Settlement of the Cape of Good Hope, in South Africa, and of the Territories and Dependencies thereof, and Ordinary, and Vice-Admiral of the same, Commanding the Forces, &c. &c. &c.

WHEREAS by my Proclamation issued at Head Quarters on the Kye, bearing date the 10th day of May 1835, for divers weighty reasons therein set forth, I, in the name and behalf of His Britannic Majesty, and by virtue of the power vested in me as His Majesty's Representative, did proclaim and declare that the Eastern Boundary of the Colony of the Cape of Good Hope was thenceforward extended Eastward to the Right Bank of the Kye River; its new Boundary, effected by this extension, being thenceforth a line commencing at the Source of the Kye River in the Stormberg Mountains, thence following its course along the Right (or Western) Bank through the White Kye into the Great Kye, and thence to the Mouth of the latter: And whereas by my Proclamation issued at Graham's Town on the 16th day of June 1835, I did re-proclaim and confirm the said first mentioned Proclamation of the 10th day of May 1835, and did proclaim and declare that the country in the said first mentioned Proclamation described in all its extent accordingly for me a part of His Majesty's Colony of the Cape of Good Hope, and was named the "Province of Queen Adelaide." And whereas by my Proclamation issued at Graham's Town on the 14th day of October 1835, I did proclaim and declare the North Eastern Boundary of the said Colony to be a line drawn from the Source of the Kye River, in the Stormberg range of Mountains, to the Source of the Kraai River, on the Northern side of the same range of Mountains, thence down the left Bank of the Kraai to its confluence with the Orange River, and thence down the latter until it joins the Stormberg River: And whereas by divers Treaties entered into on the 17th day of September 1835, between me as Governor of the said Colony in the name of the King of England, and the Chiefs Macomo, Tyalie, Eno, Kusia for Suta and her son Sandili, Fadani for Bothma, Umhala, Tsyolo, Gazelli, Pato, Kama, and Cobus, the said

Chiefs with their Tribes, Connexions, and Dependents, were admitted and received as Subjects of the King of England: And whereas His Majesty the King of England, through one of His Majesty's Principal Secretaries of State, has been pleased to direct that His Majesty's Sovereignty over the said Territory so annexed to this Colony by the said Proclamations as aforesaid, be renounced, and that the allegiance to His said Majesty of the said Chiefs and their Tribes, Connexions, and Dependents, be also renounced: I do therefore, in His Majesty's name, hereby renounce His Majesty's Sovereignty over the said Territory, and the allegiance of the said Chiefs, their Tribes, Connexions, and Dependents, as Subjects of His said Majesty, and the same are renounced accordingly. And I do hereby repeal and annul the said above-mentioned Proclamations and Treaties, and the same are hereby repealed and annulled accordingly.

GOD SAVE THE KING!

The following Notices are published for general information, at the request of His Excellency the Governor of New South Wales:—

Notice to Mariners.

NEW SOUTH WALES.

Harbour Master's Office, Sydney, 22d August 1836.

NOTICE is hereby given, that a Floating Light is now placed near the Rocks called the Sow-and-Pigs, within the Heads of Port Jackson. It is moored in 22 feet (low water spring tide) at the distance of 190 yards N. W. (by compass) from the Beacon on the dry part of the Sow-and-Pigs shoal, and at about 60 yards outside of a rock detached from the shoal, in the direction of the Beacon, over which there is only 7 feet water, and will exhibit Two Lights placed one over the other.

DIRECTIONS FOR ENTERING.

With a Southerly Wind—Being at ¼ or ½ of a mile from the shore under the Light House, steer N. W. until the Light Vessel is seen over the extremity of the inner South Head, then haul up to W. N. W. until it bears S. W., which will lead clear of the inner South Head; haul to the wind keeping the Light Vessel on the larboard bow, pass her on the larboard hand, and in turning to windward between the shoal and the land, come no nearer the former than to bring the flat-roofed house (being the 3d to the right or to the Westward of the Windmills) in sight over the bluff of Point Bradley. When the Light House bears S. E. by E. ¼ E. a ship is to the Southward of the shoal. Another mark for having passed the shoal is the rock called the "Bottle and Glass," under a conspicuous road on the hill. By night, the mark for turning up the channel, between the Sow-and-Pigs and the shore, is to keep the Light Vessel to the East of N. E. ¼ N.; but, on approaching George's Head, vessels should stand no nearer the 3 Fathom Knoll than to get the Light to bear N. E., until the Light House bears S. E. by E. ¼ E.

The least water on the Knoll is 16 feet at low water.

With a fair Wind.—Enter as before directed, pass the Light Vessel as close as convenient, and steer towards George's Head until the westernmost Windmill is over the bluff of Bradley Point. This mark will lead over the deepest channel. In entering by night, after passing the Light Vessel, steer S. GENEESMIDDEL TEGEN DE SCHURF VAN FYNEN WOLGEVENDE SCHAPEN.

Aan den Edeur van de Gouvernements Gazette.
MYNHEER, De uitgebreide circulatie die uw Weekblad heeft als een Gouvernements Orgaan, en het belang dat gy hebt gesteld in de verspreiding van onderrigt, in verband staande met de behandeling en verbetering van de Cultivatie van Wol, nopen my het volgende Recept en Directie voor de behandeling van de vernielende ziekte, de SCHURF genaamd, aan u ter insertie toe te zenden, eene ziekte zoo algemeen onder onze kudden van Wolgevende Schapen.
Het Recept en de Directie zyn op myn verzoek ter neer gesteld, tot myn eigen gebruik, en dat van het publiek, door eenen Heer, die langdurige practikale ondervinding, zoowel in England als in Nieuw Zuid Wales, desaan gaande heeft gehad, en aan wien de Kolonie ten hoogste verplicht is, voor zyne importatien van Australisch-Saxische Merino Schapen en Cachemere Angora Bokken. Ik behoef nauwelijks te zeggen dat ik den Hr. W. A. WARLAND bedoel.
Ik ben, enz.

JOHN CENTLIVRES CHASE.

Kaapstad, 29 Dec. 1836.

Recept en Directie.

Neem van "Corrosive Sublimate" 12 oncen.
En van Sal Ammoniac, - - - 6 do.
Stamp, en los dezelve op in kookend water, vervolgens voeg er by, van

Terpentin, - - - 2 quarts.

En, sterk Tabakswater, - - - 15 tot 20 gallons.

Meng deze ingredienten ter dege door elkander. Deze quantiteit is voldoende om Een honderd Schapen in te smeren.

Een yzere pot is het geschikste om dit mixtuur in te bergen, daar yzer er gestand tegen is.

Spred de rek een Vel uit, op eenen raam van riemen, omtrent twee voeten hoog van de grond, in dit vel moet het dier de operatie ondergaan, en hetzelfde belet ook dat de vloei stof onder de operatie verspild wordt.

Het mixtuur moet gedurig omgeroerd worden.
Na dat men zoodanig getal van Schapen, als gemakkelijk in een dag behandeld kunnen worden, glad geschoren heeft, moet men het mixtuur met de hand, door middel van een grof laken, overal (met uitzondering alleen van de oogen) zoo hard als men gelyk invrywen, wel opletende, om geen enkel gedeelte hoe ook genaamd te missen. Het dier kan op beide kanten, dan op de ene, dan op de andere, in het uitgespreide vel, worden nedergelegd, terwyl Lammers met eenen kunnen worden ingedoopt in eene balie van de vloei stof, omtrent half zoo sterk als die welke voor de volwassene Schapen gebruikt wordt.

Wanneer de Schurft buiten hevig is, zoo moet dezelve na het Scheren, met een Rooskam worden afgeschraapt. Deze operatie op de ingesmeerde dieren voltooid zynde, moeten zy naar eene schoone plaats worden gebragt, en onder geen beding in contact komen met de andere nog ingesmeerde Schapen, nog ook, in eenig oude kraal geplaatst worden, waarin besmette Schapen geweest zyn. Na twaalf of veertien dagen, dienen de ingesmeerde Schapen over het geheel lichzaam op het naauwkeurigste geexamineerd te worden, en wanneer er nog eenige symptomen van de besmetting overig zyn, moeten die deelen die nog zoodanig geëffecteerd zyn, met het mixtuur gewaschen worden, kunnende een gedeelte van dat mixtuur met dat oogmerk, in bottels gepre serveerd worden. De Schapen moeten aldus, al om de veertien dagen, gedurende acht of negen weken geexamineerd worden, na verloop waarvan, by behoorlyke opletendheid, zy geheel en al hersteld bevonden zullen worden.

De geheele kudde, op eene plaats, dient binnen den loop van een jaar, aldus behandeld te worden, op eene complete separatie door verplaatsing gemaakt worden.

Het vuur dient gunstig te zyn, gedurende het insmeren, maar mogt het gebeuren, dat er regen valt gedurende men bezig is, zoo dient men het dier gedurende twee dagen onder dak te houden.

Wanneer de besmetting byzonder hevig is, is 't raadzaam, om de Schapen, onmiddellyk na het scheren, en voor het insmeren derzelve, nat te maken met een mixtuur, bestaande, voor Rammen en groote Hamels, per Honderd, uit

Zwavel, - - - 1 lb.

Melk, - - - 3 gallons,

en voor Ooyen, per Honderd.

Zwavel, - - - 1 lb.

Melk, - - - 3 gallons.

Dit natmaken moet geschieden des avonds, waarna zy digt te samen moeten opgesloten worden, om uitwaseming te verwekken, zy kunnen den volgenden morgen worden uitgelaten om te grazen, maar moeten onmiddellyk daarna wederom opgesloten worden, tot den volgenden dag, wanneer het insmeren zal plaats hebben.

Het gewigt dat men aan de reinheid der Schapen hecht om de vrees voor de uitbreiding dezer besmetting en de voorzigtigheid maatregelen die onze Broeder Kolonisten te Nieuw Zuid Wales tot dierzelver uitroeying aanwenden, blykt uit de navolgende hoofdstukken eener Acte van den Wetge venden Raad, van die bloeyende volplanting, gepasseerd op den 31 Augustus 1832, voor twee jaren, en in 1834, altyddurend gemaakt, ten titel voerende Eene Acte tot het verhinderen der verspreiding van de besmettelijke ziekte gemeenlyk de Schurft genaamd, onder de Schapen en Lammers, in de Kolonie van Nieuw Zuid Wales, en die nader geëxpliceerd en geamendeerd is, by eene volgende Acte, van den 9 October 1835, te weten:

Wanneer iemand op eenig land tenzy aan hemzelve toebe hoorende, of door hem in huur bezeten wordende, of op eenig publieken weg, uitzendt, of uitschryft eenig Schaa p met de Schurft besmet, zal hy verbeuren eene som niet te boven staande £ 10, op convic tie voor een of meer Regters, voor elk Schaa p, aldus uitgesonden of uitgedreven.

Schapen nogtans, mogen worden gedreven op eenen publie ken weg, gedurende de maand February.

Wanneer er Schapen besmet met de Schurft, gehouden wor den, op eenig land doorsneden door een publieken weg, zal notificatie, van zoodanig besmetting aan elk einde van den weg, worden geaffixeerd.

Eenig Persoon opzettelyk in vryheid stellende, of aan zich zelve overgeevende besmette Schapen, subject aan eene geld boete van £ 20

Persoonen die besmette Schapen onder hun opsigst hebben, en door welker verkeerd gedrag zoodanige besmetting op de Schapen van eenig ander persoon wordt overgebragt, subject om zoodanig ander persoon schadeloos te stellen.

Slagters die besmette Schapen of Lammers in hunne

possessie hebben, met oogmerk om te slagten of het vleesch te verkoopen, subject aan poenaliteiten, en het vleesch van alle zoodanige Schapen of Lammers te worden vernield.

De Preamble der Acte, van de voorzieningen der zoo even gequoteerde Acte te amenderen, zegt, dat dezelve hoogst weldadig bevonden zynde, in het stuiten der besmetting, in dat gedeelte der Kolonie, waartoe derzelver operatie beperkt geweest is, derzelver voorzieningen zich nu zullen extende ren tot alle gedeelten van het Territorium, en geeft aan de Regters de magt, om schriftelyke Autoriteiten te verkiezen, om Schapen te examineren, die onder Eede door een Klager verklaart worden, besmet te zyn, en zelfs om ze van de weide te removeren, wanneer zy besmet bevonden worden.

THE SUGAR QUESTION.—OCT. 3.

The long existing mischievous and unjust protecting duty on West India Sugar, is now beginning to be surrounded on all sides. The diminished supply and the deficient prospects of the crops in the West Indies, bear upon it in one direction—the cultivation of Beet Root Sugar in this country, the impulse to which has been caught from France, bears on it in another direction—the East India Company, at a meeting of Proprietors last week, have been bearing upon it in another—the impoverished and oppressed Sugar Refiners bear upon it in another—the East India Sugar Company bear upon it in another—the twenty millions of Compensation money to the West India Planters, seventeen millions of which have been paid them, or are ready to be paid them, bear heavy upon it in another. The fact is, that it is beset on all sides, and it must surrender—against so many potent assailants, it is impossible that it can prevail.

The cultivation of Beet Root, if it be successful in this country, will be a great benefit to the Landlo ds; and their interest in the Legislature will be found sufficient to match that of the West Indians. We are given to understand that every opportunity will be furnished by Government to make the experiment, with a view to the benefit of the agricultural interest, which they have had considerable difficulty in keeping quiet, and which appears to be the only thing which they can do for that interest. Should this experiment answer, the West Indians will find that their protecting duty will not be allowed to come in to nullify such experiment, and that too after the payment of twenty millions' compensation money! The country would rise up under such circumstances and back the landed interest—the Refiners either would or ought to back them—The East India proprietors would do the same—the East India Sugar Company would do the same—the Sugar trade would do the same, not so much for the benefit of the landed interest as for their own, in securing the abolition of the protecting duty. We do not advocate the cause of the "THE UNITED KINGDOM BEET ROOT SUGAR CULTIVATION ASSOCIATION" on account of the landed interest. Not that we have any antipathy to that interest, but because we think that interest has been sufficiently attended to already.—They have the Corn Laws, which are protecting duties for them—but prohibiting duties to our Foreign commerce—and for the abolition of which duties we have labored and will labor.—We advocate the cultivation of Beet Root Sugar in this country, in the hope that it will increase the strength of the interest that is opposed to the protecting duty on West India Sugar. We will not rest until this duty is abolished; and we will join the West Indians or any other body in urging the abolition of the Corn Laws; and of all other protecting duties that can be shewn to stand opposed to the interests of the trade of the country, and to the welfare of the people at large.—Mercantile Journal.

Compensation Claims.

To the Editor of the Government Gazette.

SIR,—I cannot apologise with "I hope I don't intrude" in addressing you upon the subject of the Compensation Money.—Tricks in trade are proverbial, and to buy cheap and sell dear is the Masonic Secret of the Counting House, but that there should be found Men so totally forgetting the proud pre-eminence which the Parliament of their Country are noted for, that of fulfilling without exception its pecuniary engagements, as to bruit all over Cape Town, and the Country Districts, that Parliament have falsified their Engagement as to the payment in full of the appraised value of the several Apprentices for this Colony, and that they are to be paid in Stock depreciated and depreciating daily in value, is a calumny upon the country too long allowed to be circulated in this place uncontradicted.

Parliament was prorogued on the 20th August last, by the King in person, and in the Speech, addressing particularly the House of Commons, His Majesty says,

"I am also gratified to perceive, that you have MADE PROVISION FOR THE FULL AMOUNT OF THE COMPENSATION AWARDED TO THE OWNERS OF SLAVES IN MY COLONIAL POSSESSIONS, and that the obligation entered into by the Legislature has thus been fulfilled."

Can a few straggling Letters, written perhaps, and most probably for the express purpose of "knocking down the Market," a phrase well understood in buying Compensation Claims, so far gain credence with the native-born Subjects of His Majesty, in this Colony, as to make them not only dissatisfied but grounding that dissatisfaction in the non-fulfilment of the Contract made with them in Parliament, namely, that they should be paid the full amount of the Compensation awarded them against the above declaration in the King's Speech?

I trust that this letter may dispel every fear. I do assure them that there is not the slightest foundation for such a rumour, and I envy not the National feelings of any British-born subject (if he has any) who can lend himself in propagating so foul a calumny and reproach on the Legislature of Great Britain, which consists of King, Lord, and Commons; and that the several Claimants may rest assured that they will be paid "to the uttermost farthing," the full amount of the Compensation awarded to them.

Not to write fictitiously, I subscribe myself,

Your obedient servant.

The Coal Monopoly in the North and the London prices of Coal.

The high prices of Coals in London, and the combination which causes those high prices, have attracted public attention. The report of the parliamentary committee on the state of the Coal trade of the metropolis has been published and much read. The first paragraph that strikes us, is that which shows the combination that exists to keep up the prices of Coal:—

"When it is understood by the Coal-owners that all the parties interested in the Coal trade on the Tyne and Wear are willing to enter into an arrangement of this nature, a representative is named for each of the collieries; these representatives meet together, and from amongst them choose a committee of nine for the Tyne and seven for the Wear; this being done, the proprietors of the best Coals are called upon to name the price at which they intend to sell their Coals for the succeeding twelve months; according to this price the remaining proprietors fix their prices; this being accomplished, each colliery is requested to send in a statement of the different sorts of Coal they raise, and the powers of the colliery—that is, the quantity that each particular colliery could raise at full work, and upon these statements the committee, assuming an imaginary basis, fix the relative proportions as to quantity between all the collieries, which proportions are observed, whatever quantity the markets may demand. The committee then meet once a month, and according to the probable demand for the ensuing month, they issue so much per 1000 to the different collieries; that is, if they give me an imaginary basis of 30,000, and my neighbour 20,000, according to the quantity of our Coal, and our power of raising them in the monthly quantity, if they issue 100 to the 1000, I raise and sell 3000 during the month, and my neighbour 2000; but in fixing the relative quantities if we take 800,000 chaldrons as the probable demand of the different markets during the year, if the market should require more, an increased quantity would be given out monthly, so as to raise the annual quantity to meet the demand, were it double the original quantity assumed."

"In the evidence before the committee, Mr. Brandling states, that 'the nature of the regulation has been the same whenever it has been renewed, the object being to apportion the vend to the different collieries, according to the quality of the Coal and the powers of raising that Coal.'

"Do you mean by that to affix what quantity should be supplied by each colliery? Yes, with relations to their competitors, without any reference whatever to total quantity to be supplied to the market."

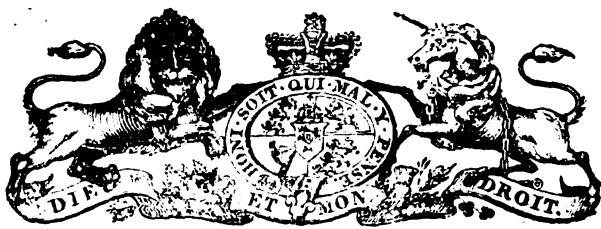

It is very clear from this paragraph, that there is a regular combination amongst the Coal-owners, and that this combination is injurious to supply at market, by stopping their competition with each other. In fact, this combination is the destruction of competition, and the support of high prices. It is to be observed that the combination does not affect the whole quantity of Coals at market, but the quantity which each shall supply. So much Coal is calculated to be wanted in the London markets for a given time, and each of the Coal-owners is to furnish such a portion of that quantity, according to their ability; but if it should prove that they could furnish more, they must not—they must keep to their proportion with other Coal-owners. If it proves that the London Coal market requires more Coal than what was calculated, then the quantity which each sends must be increased, but still the original proportion is observed. This is the substance of the agreement, according to this evidence; and if one Coal-owner found that he could send twice the Coals which he is appointed to send, the rules of this combination would not allow him. Here is the mischief, that this market, unlike any other market can never have a supply larger than the demand; and consequently, prices are not affected in this market, as they are in our other great wholesale markets.

The following are amongst some of the conclusions and recommendations of the parliamentary committee:—
 "The result, therefore, is, that at present the great majority of the Coal-owners on the river Tyne, Wear, Tees are combined avowedly to limit the supply of Coals to the London market so as to raise the price to the consumer higher than a free trade would command; and also to force on the market a large portion of inferior Coals at prices which could not be maintained otherwise than by such a combination."

"Your committee, therefore, recommend that the interests of the consumer shall be protected against such proceedings of the Coal-owners, by the removal of all existing impediments to the free supply of that article."

The London public are taking up the matter, and the Lord Mayor has intimated that if a public meeting be called in the city, he will have no objection to preside. We sincerely hope that this meeting will be speedily called—that it will devise some project to remedy the existing evil by counteraction, and that any Coal-owner will be at liberty to supply the market with his coal in what quantities he thinks proper, the same as other importers of goods supply other markets. The opposition of the Coal-owners of the north to the Sunderland Railway Bill, which would have increased the supply and lowered the price of Coals in London, is still fresh in our recollection.—*London Paper*, Oct. 4.

THE CAPE OF GOOD HOPE Government Gazette.

Published by Authority.

FRIDAY, FEBRUARY 24, 1837.

AT the Court at St. James's, the 5th day of October 1836,

PRESENT,

The KING's Most Excellent Majesty in Council.

WHEREAS by a certain Act of Parliament, passed in the session of Parliament held in the third and fourth years of His present Majesty's reign, intituled "An act for the abolition of slavery throughout the British colonies; for promoting the industry of the manumitted slaves; and for compensating the persons hitherto entitled to the services of such slaves;" after reciting, that it was necessary that provision should be made for the apportionment, amongst the proprietors of the slaves to be manumitted by virtue of the said Act, in each of the said colonies respectively, of that part of the said compensation fund which should be so assigned, as in the said Act is therein before recited, to each of the respective colonies; it was, amongst other things, enacted, that any person having, or claiming to have, any right, title, or interest in or to any mortgage, judgment, charge, incumbrance, or other lien upon any slave or slaves to be manumitted under the said Act, might prefer such claims before the said Commissioners:

And it was further enacted, that the said Commissioners should proceed in the manner to be prescribed by any general rules to be framed in manner particularly mentioned, to enquire into, and adjudicate upon, any such claims as might be so preferred to them, and should upon each such claim make their adjudication and award, in such manner and form as should be prescribed by any such general rules; and if any person interested in, or affected by, any such adjudication or award should be dissatisfied therewith, it should be lawful for such person to appeal therefrom to His Majesty in Council, and notice of any such appeal should be served upon the said Commissioners:

And it should be competent to His Majesty in Council to make and establish all such rules and regulations as to His Majesty should seem meet, respecting the time and manner of preferring and proceeding upon such appeals, and respecting the course to be observed in defending the same; which rules should be so framed, as to promote, as far as might be consistent with justice, all practicable economy and dispatch in the proceeding until the decision thereof:

And it was further enacted, that the several adjudications and awards of the said Commissioners, unless duly appealed from within the respective times to be limited by His Majesty in Council for that purpose, should be final and conclusive and binding upon all persons interested therein, or affected thereby; and that the decisions of His Majesty in Council upon any such appeal should, in like manner, be final, binding, and conclusive:

And whereas His Majesty hath this day taken into consideration the propriety of making and establishing certain rules and regulations, for limiting the time within which appeals shall be preferred to His Majesty in Council from any adjudication or award of the said Commissioners:

Now, therefore, in pursuance of the said Act of Parliament, and in execution of the power in His Majesty in that behalf vested, His Majesty, by and with the advice of His Privy Council, doth order, and it is hereby ordered, that whenever it shall happen that any person interested in, or affected by, any adjudication or award of the said Commissioners, shall be dissatisfied therewith and shall be desirous to appeal therefrom to His Majesty in Council, then and in every such case, such person or persons shall

duly lodge a petition of appeal, within fourteen days from the date of such adjudication or award, and shall forthwith serve a notice of such appeal upon the said Commissioners, by leaving the same at the office of the said Commissioners, and that no appeal from any adjudication or award of the said Commissioners shall be received, nor the proceedings under such adjudication or award be in any way suspended, unless such petition of appeal shall be so lodged, and notice thereof be so served on the said Commissioners, within the said period of fourteen days from the date of such adjudication or award as herein-before mentioned.

From the Morning Herald of Dec. 13, 1836.

By a letter from H. V. S. *Vestal*, off Grenada, we find that on the 21st Sept. that vessel had captured the Portuguese schooner *Negrinha*, with 336 slaves on board;—on the 28th Sept. after a chase of 4 hours, she captured the Spanish brigantine *Empress* with 435 slaves on board;—at 9 P. M. of the same day, she captured the Portuguese brigantine *Phenix*, with 480 slaves on board. The *Vestal* had sent these vessels to different Ports to be condemned, and was again ready to start on a cruise after a slaver, which was expected between Tobago and Grenada.

Information having reached our Cruisers, that a number of vessels, loaded with slaves, was expected at the Havannah, a sharp look out was kept, and much prize money anticipated.

From the American Papers we hear of the loss of the ship *Bristol*, Capt. McKoun, from Liverpool, on Far Rockaway. At 4 before 4 A.M. the ship struck, and although only within half-a-mile of the shore, no assistance could be afforded.—Forty persons only are saved, and upwards of sixty lost. This awful catastrophe is attributed by the American Papers, in a great measure, to the negligence of the Pilots. On this occasion

the Pirates acted most brutally. The persons, and trunk of those who are providential escape, were searched and robbed by these villains. One poor creature, who was thrown on the shore in a state of insensibility, was robbed of all he had in the world—amounting to 10 sovereigns.

The *Atoll* has taken in stores and provisions for the Islands of Ascension and St. Helena, and is to return to England with troops from the Cape of Good Hope.

COMMERCIAL RETROSPECT.—Dec. 5, 1836.

The principal feature in the Colonial Markets during the past week has been in Coffee, all descriptions of which have experienced a better sale, and a slight improvement in the value has taken place. With this exception every thing remains in the same languid state as for several weeks past. The importers of all kinds of Sugar, particularly West India, still continue to entertain little or no confidence, which causes prices to come down with much rapidity.

We have, during the existence of the present trying time in money matters, laboured hard to show that there was no real ground for apprehending a very great shock to public credit—that although we were passing through a severe trial, still that we should come out of it with much less mischief than was anticipated by many imaginative and timid people, and that matters would again work their way slowly but surely back into their accustomed channels. The past week has shown some auspicious indications, which, though slight, are still auspicious of ultimate and effectual relief to the monetary and mercantile interests. The quotations of English Securities are all higher this week, Consols have touched 88, Exchequer Bills have been 9 11 prem., and Bank Stock has advanced to 205½ 206½, all of which prices are considerably better than last week, and these prices are amongst the quotations at the latter end of the week, all of which were at higher figures than the commencement. To-day Consols have been 88½, and Exchequer Bills 9 11 prem.

The course of Foreign Exchange has also been of higher rates for all the principal places on the continent; and we have had few reports of fresh failures either of large or small dimensions. All this looks well, and augurs, as far as it goes, good for the future.

It was settling day in the Foreign Market on Wednesday; the balances were not heavy, and all was satisfactorily adjusted.

Money has been scarce, and the contest between the Bank of England and the Joint Stock Bank, the former refusing to discount the Bills of the latter, will doubtless throw a great number of obstacles in the way of commercial men.

Owing to boisterous weather, the number of vessels arrived at our ports this week has not been large, and Lloyd's books have recorded a great number of disasters at sea, owing to the late gales.

Dec. 6.—Considerable inactivity pervaded the Colonial markets to-day, only one public sale was brought forward; and privately the business done was very limited, and still almost confined to the immediate wants of the home trade.

The English Funds have been at better prices to-day: Consols account 88½, for money, shut; Exchequer Bills 11 14 prem.; Bank Stock 206½. Owing to a report of Bilbao being again in jeopardy, Spanish Bonds have declined to 13½; Portuguese 5 per cents 44½.

STOCKS.—The British Plantation raw market was exceedingly flat to-day; the business doing was to a very limited extent, and confined to the grocery descriptions. A public sale of 122 hhds. Barbadoes went off with much heaviness at a decline of fully 1s per cwt. on the last sale, and only a part found buyers, middling and fine yellow sold at 63s 6d to 66s 6d per cwt. The estimated purchases, exclusive of the above public sale, are 150 hhds. and tuns. at a general reduction on prices of Friday of 6d per cwt.

The stock of B. P. is 35,083 hhds and tierces, against 29,054 at the corresponding period of 1835, thus showing an increase of 6,029 hhds. and tierces; the weekly deliveries are 1715 hhds and tierces, against 2136 at the same time last year, thus showing a decrease of 721.

The stock of Mauritius is 27,395 bags against 43,541 at the same time last year, thus showing a decrease of 16,145 bags; the weekly deliveries are 3,041 bags against 3,762 last year.—These returns include the East India Dock Company.

Refined.—There was scarcely any inquiry for either grocery or shipping goods, and the prices were unvaried.

COFFEES.—The market was quiet to-day; not a single public sale was brought forward, and by private contract the transactions either in East or West India were trifling, but the importers succeeded in obtaining full prices. Some little business was doing in Brazil at the advance which took place at the close of last week; the only sales advertised consist of about 240 casks of British Plantation, for Thursday and Friday next.

The present stock of British Plantation Coffee is 4158 casks and 1572 barrels and bags, against 4072 casks and 1920 barrels and bags at the corresponding period of last year; thus showing an increase of 86 casks, and a decrease of 348 barrels and bags. The deliveries last week were 200 casks and 110 barrels and bags, against 290 casks and 103 barrels and bags at the same time last year.

REFINED SUGAR FROM BEET ROOT.

There are now in the market from thirty to forty tons of Refined Sugar derived from the Beet Root cultivated in this Kingdom. We have seen the samples: the colour and the quality are good; and the price asked is 100s per cwt. That such Sugar has been obtained from Beet Root cultivated in this country is to us a matter of congratulation. The success of the experiment proves that the Root can be cultivated here. It is understood that government will give every facility for a fair trial of the matter; and that they will not encumber the matter in its infancy with the question of duties. This is done with a view of benefiting the landed interest—with the motive whence it is done we do not care to trouble ourselves; we look to the thing itself: and while such success has attended the cultivation of this Saccharine Root in France we rejoice in a successful introduction of that cultivation into this country.—*London Paper*. Dec. 6.

THE EXPORT OF BOHEA TEA AND THE DUTY RETURNED.

The Tea Market will be relieved by this measure and so will the Money Market. It is rather unusual for government to return money which has been paid to them, but in this instance they have, and we believe the matter is somewhat of a novelty. The Custom House Officers could not understand the matter at all, until an order from the Lords of the Treasury to that effect was sent them. This order was sent we believe on the application of the great House of Messrs. Baring; and now Bohea Tea on which the duty has been paid may be exported, and the duty paid thereon will be returned. This is as it should be, and it is no more than what the Tea Trade has a right to expect; and we cannot see now, what consistent objection can be made to allow any other kind of Tea to be exported under the same circumstances, should the holders of

such Tea require it.—A precedent is now to be found: and precedents are very powerful, and in some instances very awkward matters.—Dec. 6.

Dec. 12.—Sugar continues to give way in price with much rapidity, particularly British Plantation Raw, which, from the very great decline that has taken place of late, occasions some anxiety amongst the merchants and others, and the consequence has been that some Houses have been compelled to suspend payment. In the provision trade the failures that are daily taken place create an increased want of confidence, and tend so much to damp the market that the business doing is scarcely sufficient to meet the necessary wants of the trade.

In the Money Market the most prominent feature has been a considerable advance in the quotations of Securities, particularly English. For Money Consols have been shut, but for the Account they have touched 89½, which is a very considerable advance, and in them the transactions have been considerable. Since this highest point which they have touched, they have been 88½ 89; on Saturday they were 88½, and 88½ to-day. The operations in Consols have been considerable, and at the time they were at the highest the 3 per Cents Reduced were 88, and the 3 per Cents 86½. These quotations show a considerable rise on the advanced quotations of last week, even Bank Stock has also touched 208 2-9, and Exchequer Bills have yielded quotations at 15 prem. but have since been down to 13 prem. and in them the operations have been extensive; to-day the quotations of Exchequer Bills have been 11 13.

This advance in the English Funds is an additional evidence to what we have previously and repeatedly stated, that our monetary derangement will gradually work itself back into its wonted condition; and, as far as we can see at present, without any of those violent convulsions which some weak and timid, though well meaning people, anticipated and predicted. The number of great mercantile stoppages announced this week has been smaller than before; such stoppages seem almost to have stopped; and should they commence again, however, we are still of our former opinion, that while we may have a little sprinkling from the black and threatening cloud, it will not spend its fury upon us, but blow over. There is but little mercantile business doing, but this is always the case at this season of the year, and although from all we can gather from mercantile men, we are sure that money is still nearly as scarce as ever, yet still from the comparative sound state in which we were before the recent severe season set in which has been proved by facts in that respectable source of information, "The Bankers' Circular," from which we extracted largely last week, and the week before, we feel confident that although the trial may be fiery, the issue will not be disastrous. We have said it before, and this is the time for saying it again, that we are labouring under no national calamity or providential visitation, but merely under the workings of our system of business itself, and there is in the system the means of its own cure.

Lloyd's books have recorded a great number of disasters to vessels at sea from the late heavy gales.

Letters from New York to the 14th ult. reached town on Wednesday. They state that the money market was in a more quiet and sound state than when the previous advices left. Two per cent per annum was the current rate of discount on good paper. The banks were discounting a little more freely, and there had been no failures for some time. The papers were, however, chiefly filled with the elections for the President. Whether Van Buren will succeed remains yet to be seen.

It appears from Continental news, that Prince Metternich, is very liberal in his views of trade, and it is said that it will be the fault of our ministers if we do not obtain a modification and reduction of all those duties which have interfered with Austria and the Germanic Union. Our government must set the example of reduced protecting duties however, for this country was the first to set the example of excluding duties.

To-day intelligence from the United States to the 24th ult. has arrived. The election of Mr. Van Buren to the Presidency is now placed beyond doubt. This intelligence communicates nothing new relative to the money market in the States. At New Orleans Carpenters were receiving at the rate of five dollars per day, and Labourers two!

SLAVE COMPENSATION MONEY.

(From the S. A. Commercial Advertiser.)

All doubt on this subject has now been set at rest by the actual payment of a number of the Claims sent from the Cape of Good Hope.

On these Claims, which were paid in Stock, the interest on the Capital from the 1st Dec. 1834, up to the day of payment, added to the price of Stock in the Market on that day, raised the sum actually received to about one per Cent. above the Sum awarded by the Commissioners at the Cape.

FROM the numerous advertisements in the *Zuid Afrikaan* and *Gazette*, relating to the above Property, and from a rumour which has reached me of Mrs. GRIFFIN'S, having obtained an Interdiction of the Sale of it, though on whom except myself an Interdict could be served, I know not, it may be thought to belong in reality to her. I therefore consider it necessary to state thus publicly that it is solely my Property, and registered in my name, having actually paid for it £1,613, of which Mrs. GRIFFIN has not paid me one stiver nor even the Interest since March last.

I agreed to transfer the House to Mrs. G. (and am still ready to do so, to her or her Creditors) on receiving a Bond on it for £1,500, with the Balance and Arrears of Interest, &c.—Until this be done no one can possibly, nor shall have a title to the Property; and unless arrangements for the purpose be speedily made, I will put an end to all further trouble by selling the House.

Ik oordeel het dus noodzakelyk, dus openlyk te verklaren, dat het eenig en alleen myn Eigendom is, en geregistreerd staat in myn naam, hebbende ik Actuel £1,615, voor hetzelfde betaald, en waarvan *Jufv. GRIFFIN* my nimmer een stuiver heeft betaald, noch ook zelfs de Renten sedert Maart 11.

Tot dat dit gedaan is, kan iemand onmogelyk, en zal ook niemand een Regt van Eigendom op het Huis verkrygen, en tenzy de arrange-menten tot dat einde zeer spoedig gemaakt worden, zal ik een einde maken aan alle verdere moeite door het huis te verkoopen.

COMMERCIAL RETROSPECT.

Dec. 19.—The only new feature in the Colonial Markets during the past week is the reaction which has taken place in British Plantation Raw sugar, the prices of which have at length taken a turn in favour of the Importers, and more eagerness has been shown to make purchases than for some time past, both by the Grocers and Refiners, the latter of whom have for a lengthened period scarcely been in the market at all, principally from the discouragement they have met with from the export trade. At the close of the week one or two mercantile houses were reported to have suspended payment, but they created little sensation, their liabilities it being supposed not reaching any considerable amount.

The Provision Trade is still in an unsettled state, but every article appears to have a very firm appearance, and the prevailing opinion is that higher prices may be looked for. In the Silk Trade there seems to be a little more anxiety on the part of the manufacturers to come into the market, it being anticipated by them that the prices of that commodity have seen their lowest point. We continue to have a good number of arrivals from all parts of the globe, but in our export trade we cannot note any improvement.

The English Money Market has this week been steady in prices, and the transactions have not been considerable.—Consols for Money continue shut; for Account the highest price has been 8 1/2, the lowest 8 1/4, the average price 8 1/4; today the quotation has been 8 1/4. Exchequer Bills have been 10 premium, which is the highest price that they have touched since their uniform conversion into 2 1/2. per day interest bearing; the general price has been 13 1/4. today the quotation has been 14 1/2. The Commissioners for the Reduction of the National Debt have been doing business in Exchequer Bills, and it is said that jobbers, who bought extensively of these Bills when they were at their lowest, are now realizing large sums. Bank Stock has been 210. The 3 per Cents

Reduced have been about 1 per cent. behind Consols, and the 3½ Reduced have been 96½.

We have it not yet in our power to say that money has been more plentiful, but we have not to record any mercantile stoppages of any consequence this week. Public credit has not yet been shocked by any of those great convulsions which many persons predicted would ere this have taken place. That credit still stands tolerably erect all things taken into account, and that it is capable of standing a much rougher gale than that which has recently sprung up, we feel as confident as we are of our own existence. Some portion of the public press which ought to have known better, have labored hard to make bad worse—they have magnified matters, and, instead of trying to diminish real alarm, have created fears for which there were no foundation, by dark and indefinite statements and by melancholy prophecies. The real facts that have come to light in the working of the recent money unhingement, have never been of a kind yet, to alarm sensible people for the safety of public credit. Many little people have gone doubtless and probably many more may go, but these can never seriously endanger public credit—Fancy does infinitely more mischief at such a time than fact, and so far from requiring to be stimulated, needs to be closely curbed.

Dec. 20.—COTTON.—There continues a good demand for East India kinds, principally for Surat for exportation, at fully, and in some cases ½d per lb. higher than last week.

SUGAR.—There was a brisk demand for West India Raw to-day, both from the growers and refiners, particularly from the latter, and prices were again rather higher, making an advance of full ½s. per cwt. on the currency of this day week; the quantity calculated to have been sold is about 1.4 0 hhds. and tierces; Jamaica good grocery sold at 6½, Berbice good brown for the pan at 5½, 6d., and Antigua very good grocery at 6½, per cwt. There was no public sale of Barbadoes, but by private contract there were more enquiries, and a parcel of good colony in second hand sold at 15s. per cwt.

The stock of B. P. is 33,993 hhds. and tierces, against 25,167 at the corresponding period of 1835, thus showing an increase of 8826 hhds. and tierces; the weekly deliveries are 1898 hhds. and tierces, against 2,278 at the same time last year, thus showing a decrease of 380.

MAURITIUS.—There are more enquiries for the good colony descriptions, but the transactions are limited, the prices are however a little stiffer; at present there are no public sales advertised.

The stock of Mauritius is 28,142 bags, against 36,363 at the same time last year, thus showing a decrease of 8,221 bags; the weekly deliveries are 2,59 bags, against 2,911 last year.—These returns include the East India Dock Company.

COFFEE.—There were no public sales of any description of Coffee to-day; 41 casks Berbice, 277 bags Ceylon, and also 1,390 bags of other East India had been announced to take place, but were postponed till to-morrow. By private contract little or no business was done. The few sales reported in Ceylon admissible for consumption at the 6d. duty, are at 70s. for good ordinary, which is a shade easier. There is scarcely any Brazil offering, the holders not being disposed to sell at the present prices.

TEA.—The merchants' sales finished this day; considerably more than one-third of the quantity offered has been sold; towards the conclusion a better price was obtained for Boheas by the few importers who were willing to meet the market. Hyson and Congou also experienced an improved demand. The only new feature in the market is an enquiry for East India Company's Boheas at ½d. to 1d. prem.

The sale having closed at too late an hour to enable us to alter our tabular quotations, we give the following. Bohea, Canton s. 1d. to 2s. 4d.; Fo i n 2s. 7d. to 2s. 8d. per lb. both duty paid; Congou common 10d. to 1s. 0d. middling and strong s. 1d. to 1s. 9d.; Fine and Pekoe kind s. 1d. to 2s. 9d.; Souchong, middling to 1s. 4d. to 3s. 4d.; Pekoe, black leaf s. 5d. to 2s. 4d.; Flowery 2s. 1d. to 2s. 6d.; Hyson skin s. 1s. 10d.; Twankay, common and fine 1s. 4d. to 1s. 10d.; Hyson, common 2s. 4d. to 2s. 4d. middling and fine 2s. 6d. to 5s. 3d.; Gunpowder 3s. 6d. to 4s. 8d., Imperial 2s. 9d. to 3s. 2d. per lb.

NOTICE.

THE Civil Commissioner of the Cape District, having received information that certain persons allow their Cattle to graze and water at the public Dams and Outspan Places in this District, contrary to the existing Law, requires all Field-cornets, Contractors, and others, strictly to attend to the Regulations on that subject, which are now published for General Information.

Civil Commissioner's Office,

Cape Town, 4th March 1837.

P. B. BORCHERDS, Civil Commissioner.

His Excellency the Governor and Commander in Chief has been pleased, at the recommendation of Landdrost and Heemraden of the Cape District, to approve of the following REGULATIONS respecting the Fountains and Dams at the Public Uitspan Places in the Cape District.

Art. 1. As the keeping in repair of the Fountains and Dams at the different Uitspan Places, has been paid out of the produce of the Tolls, and given out for Contract by Government, necessity now requires, that proper measures should be taken for the prevention of all wilful destruction, and bad uses, the following Regulations are therefore prescribed

2. No Person shall approach the upper or South-east side of the Dams, in order to prevent the same from being dirtied by the sand, on pain of being fined in a penalty of Rds. 5, for the first time, 10 for the second, and 15 for the third; one half for the School Fund, of the Cape District, and the other for the Contractors of such Dam or Fountain, over and above the action of the Landdrost.

3. The Wagons, to be unyoked at the Uitspan Places, shall pay strict attention that such be done at a distance of no less than 40 paces from the Dam, under the Wind; while the Field-cornet, finding that such is not observed, shall have the right to pound the Cattle, till report be made thereof to the Landdrost; as the Offenders will fall in a penalty of Rds. 10, for the first time, 15 for the second, and 20 for the third, to be divided as above, over and above the Action of the Landdrost.

4. They shall also take proper care, that no wood, bushes, or rushes, be destroyed or cut in the vicinity of the Uitspan Places, by which the ground being loosened, they may become exposed to be dirtied by the sand, on pain of such penalty, and on behalf of such, as mentioned in Art. 3.

5. In order to provide Hogs, Poultry, &c. with the necessary water, they shall not let the same drink nor swim in the Dam, but take the water required for drinking out of it; while the Field-cornet is also directed to watch over the same, on pain of the penalty specified in Art. 3.

6. Nobody shall wash any goods in the Dam, but also take out the water for that purpose, on pain of the said penalty, to be divided as above stated.

7. The Inhabitants shall particularly direct their Drivers or Herdsmen, to take care, that after the unyoking of more than one Wagon, all the Cattle do not go together to the Water, as by a multiplicity, the Dam would be entirely trodden down and destroyed.

8. No Inhabitants, living in the Plains, or elsewhere, and having contracted with the Butchers for the grazing of their Cattle, shall make use of the Water or Pasturage of the Public Uitspan Places, but provide the Cattle contracted for with the same at their own Places; while the use of the Water and Pasturage of the Public Uitspan Places is only to be allowed to travelling persons; all under such penalty and on behalf of such, as is stated in said Art. 3.

9. No Field in the vicinity of the Public Uitspan Places shall be set on fire under whatever pretext, while he being convicted thereof, shall be proceeded against by the Magistrate, without respect of Persons.

10. None of the neighbouring places shall assume any right to the Water or Pasturage of the Public Uitspan Places, on pain of the above-mentioned penalty; the use whereof being hereby expressly forbidden; and it is also particularly recommended to the attention of the Field-cornet, carefully to watch over the same, and take such Cattle as are found at the said Uitspan Places immediately under his charge, till the same, after the payment of the above penalties and expenses of the Pound, shall be redeemed by the Owner or Owners; for the receipt of which the Field-cornet is hereby qualified, and whereof he is to keep proper annotation, for the information of the Landdrost; and for the prompt maintenance of this Art., every Inhabitant whomsoever is hereby qualified, to send such Cattle as may be found there to the Pound.

11. The Inhabitants, at the unyoking, finding that the Dams are not clean or destroyed, shall give notice hereof to the Field-cornet of the District, who is obliged to inform the Contractors of it, in order to take immediate precautions, and they, after such information, delaying longer than 48 hours so to do, the Field-cornet shall send in a written report thereof to the Landdrost's Office, in order that the necessary measures may be taken accordingly.

12. Finally, the respective Field-cornets of the several Districts are directed to pay attention, that the tenor of these Regulations be strictly complied with, in order thereby to secure to the public, in the transport of their produce, the uninterrupted enjoyment of those so necessary Uitspan Places. The Field-cornets being ordered communicatively to inspect the state of the New Dams with the Contractors, in order immediately to repair the damages occasioned to the same.

And in order to prevent these Regulations from being transgressed, every Person is hereby requested (and if necessary) directed, seriously to warn their subjects or wagondrivers, strictly to observe these Regulations, as the Owner or Owners of such will be responsible for the above-mentioned Penalty, from whom the same will be recovered. Cape Town, 23d Feb. 1813.

By order of Landdrost and Heemraden aforesaid,
(Signed) J. J. L. SMUTS, Sec.

The following Extract of a Despatch, dated 24th December 1836, addressed to the Commissioners of Compensation, in London, is published for General information:—

"In the absence of any particular Instructions from your Board, with regard to the execution of Powers of Attorney by Executors, Trustees, Curators, Guardians, and others claiming to execute Powers, we have deemed it essentially necessary to demand proof of their appointment, previous to granting the Instruction for a Power of Attorney; and in cases where Parties have executed such Powers, without having exhibited to us such proof we have invariably demanded and obtained it prior to advising your Board of our having Registered such Powers. This course rigidly adhered to by us, would appear to be all that is required."

On Saturday last, it blew a stiff breeze, but not amounting to a Gale, from the S.E., and at about 12 o'clock, the brig Maria signalled that she had parted her best bower, which signal was answered from the Port Office.—At about 5 o'clock she was observed to be broadside on, and little doubt was entertained of her fate. She brought up, however, with her stream anchor, and a small warp or hawser, by which she rode until 7 o'clock, when she parted and came on shore. The crew were landed in safety by 9 o'clock, and at midnight, she became a total wreck; a considerable quantity of tallow, wool, hides, goat skins, &c. was on board, a portion of which has been washed on shore, but nothing of any value was saved from the wreck.

The brig was said to be well found in ground tackle, and various causes are assigned for the disaster, as the South-easter was not very strong. The St. Helena and Skerne rode it out without injury.—(From a Correspondent.)

REGULATIONS OF THE MUNICIPALITY OF GEORGE.

1. The Municipality of George shall comprise the whole Town and Commonage or Grazing Lands belonging thereto.
2. There shall be Five Commissioners for the Municipality, who shall meet once in every month, or oftener, the time and place being notified on some conspicuous place or places.
3. The Immoveable Property shall be formed into four or more classes, according to yearly rental or value to be estimated by the Commissioners.
4. The Commissioners are empowered to obtain a larger supply of Water from the most eligible source or sources to which the Inhabitants have a common right, and to cause the Water to be conveyed by dikes or channels outside, and along the different Erven, and not otherwise, and to defray the expense with such monies as shall be raised by any rate or rates duly imposed and levied for that purpose. And the Commissioners shall be bound to make a yearly estimate of expenditure to be required for defraying the expenses for the distribution of water and other contingencies.
5. Every proprietor or occupier of an Erf shall, with regard to the irrigation of his Erf, be bound to conform to the water distribution, to be made by Commissioners, and the Rules and Regulations touching the same, and any person contravening any of the said Rules and Regulations, to the detriment of any other proprietor or occupier, by

turning off the water of another, prior or subsequent to his proper turn, or causing it to be done, shall forfeit a sum of £1, for the first, and £3 for each subsequent offence, provided always, it shall be lawful for any person, by consent of another, to make use of the water belonging to the person who so gave his consent, on condition, however, that care be taken that the person whose turn follows, does not suffer in the least thereby.

6. The proprietor or occupier of an Erf, who shall not keep his sluice in a proper order, so as to be enabled after having had his due proportion of water, to shut said sluice in such manner, that the whole stream is entirely turned off towards his neighbours or to the person next in turn, and that no water whatever, either by leakage, oozings, or otherwise, can possibly run into his own Erf, shall forfeit a penalty of £1 for the first, and £3 for each subsequent offence.

7. Any person who shall be found washing clothes in any of the springs in the forest above the dam, or in the said dam, or in any of the canals or water courses, or throw any filth in the dam, or in any of the springs or water courses above-mentioned, shall forfeit for the first offence a penalty of £1, and for each following offence £3 sterling.

8. No person shall be allowed to cast any filth or rubbish on any other places than those to be approved by Commissioners for that purpose, under a penalty of 15 shillings for each offence.

9. Every proprietor or occupier of an Erf who shall not keep the canals or water courses conducting the water as far as his Erf extends, clean and in a proper order, but negligently, or wilfully, allow the same to remain in such defective condition, as to obstruct the water running freely, shall forfeit £1 for the first, and £2 for every subsequent offence.

10. Any person who shall hereafter illegally close any road, street, or lane, or obstruct the same without the sanction in writing of the Commissioners, shall, on conviction, forfeit not less than £1, nor more than £10.

11. It shall be lawful for the Commissioners to establish a Market at the usual place, being the square before the Prison, and under the following regulations, viz:

12. Any cattle, sheep, stock, or produce whatever, excepting vegetables, fish and fruit, brought into the Municipality for the purpose of sale, shall be considered and taken to be as intended for the Market, and shall therefore be exposed for sale on said Market—and subject to the Regulations thereof, under a penalty of not less than ten shillings, nor more than £2.

13. The Market hours shall be from 7 to 9 o'clock in the morning from 1st October to 31st March, and from 8 to 10 o'clock in the morning during the remaining months of the year.

14. All purchases shall be paid for in cash only, into the hands of the Market Master, who shall regularly attend during the Market hours, and see to the just weighing and measuring of every article, and decide on any dispute that may arise.

15. One per cent. shall be paid by the seller on the amount of all stock or produce sold, and the seller shall, when required, deliver the same to the purchaser at his dwelling, provided he resides in the Town, after which the Market Master shall be obliged to pay over to him the purchase money, deducting the Market Dues.

16. Any person not satisfied with the price or prices offered on the Market, shall at all times be at liberty to dispose of his stock, produce, &c., in any other way, by previously paying the Market Fees to the Market Master, such fees being determined according to the last average prices, the Market Master giving a permit to that effect; and any person refusing to comply therewith, shall be considered as infringing the Market Regulations, and become liable to a fine of not less than ten shillings, nor more than two pounds for every offence.

17. Any persons making a fire or fires in the Market, causing any dirt or nuisance, or keeping their wagons, carts, oxen, or the like, after being required to remove them by the Market Master, shall forfeit and pay a fine of not less than five shillings, nor more than one pound sterling, for every offence.

18. All scales, weights, and measures, shall be supplied by the Commissioners, and deposited with the Market Master.

19. The Market Master shall enter in a book to be provided for the purpose, the quantity and prices of articles sold, with the date of sales; also the amount of all fees, and time of receiving, with occasional remarks or observations on the quality of all articles brought to the Market, which book he shall present to the Commissioners every month, being previously sworn to, as correct, if required.

20. The Commissioners shall be at liberty to allow the

Market Master all, or part of the fees, or a fixed salary, as they may see fit, but in either case the Market Master shall account with the Board or Treasurer, on producing his books, which shall be signed by one or all the Commissioners.

21. Every proprietor or occupier of an Erf, shall be at liberty to depasture on the Town Commonage, a number not exceeding twenty horned cattle and four horses, or twelve horses only for each occupied Erf, and half that number for every unoccupied Erf; and every other inhabitant liable to do Burgher Duty, two horses for personal use, and all cattle, horses, or other animals, found grazing thereon without being so entitled, shall be considered and taken to be as trespassing, and shall or may be sent to the pound; and subject to the Pound Regulations. Persons keeping cattle or sheep for slaughter in their capacity as butchers, shall and may be allowed to keep such reasonable stock as to the Commissioners may seem proper for the supply of the inhabitants, and not otherwise, and others, being householders, not exceeding 10 sheep; but it shall not be lawful for any hawker or pedlar, not being the proprietor or occupier of an Erf, or for any person visiting this Town, to remain with his or her cattle, horses, or other animals, in the environs thereof, on the said Town Commonage, longer than for that particular purpose, excepting however by permission of the Commissioners, but shall be bound immediately on the expiration of said time to depart, and in default thereof, all his or her cattle, horses, or other animals, may be sent to the pound.

22. Any person setting fire to the pasturage of the Municipality, without the Commissioners' previous order or consent, shall be fined not less than £1, or more than £5, for each offence.

23. For the purpose of preventing as much as possible the occurrence of fire, no straw hut or cook-house shall be permitted to be made within the confines of the Town, and any person who shall have made any such straw huts or cook-house, and who shall not remove the same immediately on being lawfully required so to do, shall forfeit a sum of not exceeding £2 sterling, and such hut may be immediately pulled down and destroyed by order of the Commissioners, and no fire shall be made on any Erf, by which the nearest building or hedge may be endangered, as also, that no straw hut or cook-house be constructed on any Erf in this Town, without the previous sanction of the Commissioners.

24. The Commissioners shall cause all weights and measures to be regularly assized, according to the colonial standard, and for which 2d. will be paid for every weight or measure so assized, and Commissioners shall occasionally, when they think proper, examine or cause to be examined the same, by visiting in the day time any shop or warehouse, retailing goods or wares, and any person found with weights or measures otherwise than according to the colonial standard, shall forfeit a fine of not less than 10s., or more than one pound sterling, and such weight or measures shall forthwith be destroyed.

25. The Commissioners shall, and they are hereby fully empowered as occasion may require, to cause to be destroyed all stray or mischievous dogs, being without collars, and any person keeping dogs loose that may be in the habit of molesting passengers, shall be subject to, and incur a penalty of not exceeding ten shillings for each offence, the dog so molesting being required also on a repetition of the same to be destroyed, and the owner on refusing to comply therewith, to pay a further fine of £1, on each requisition of the Commissioners to that effect.

26. The 37th, 41st, and 42d Sections of the Ordinance No. 9, shall be in full force as far as relates to these Regulations.

27. Any person who shall carry any naked light or fire through the streets in the Town of George, or who shall cause it to be done by any of his household, shall forfeit a sum for every offence of not less than 10s. nor more than £1, to which fine also is subject any person who shall discharge any fire-arms without lawful cause, or let off fireworks in any square, street, lane, or avenue in the Town of George.

28. No lime, or coal oven for burning charcoal, or tannery, shall be made within the Town of George, except on such places as sanctioned by the Commissioners, under a penalty of not less than Ten shillings, nor exceeding £2, for every offence.

29. For the purpose of carrying these Regulations into effect, the Commissioners are hereby authorised to appoint a Treasurer, Collector, Market Master, and Overseer of the Water Courses, who shall likewise be street keeper, and shall report to the Commissioners any nuisance, or grievance, that may come to his knowledge; and shall cause all cattle or horses found straying in the streets to be sent to the Pound.

NOTICE.

THE Civil Commissioner of the Cape District, having received information that certain persons allow their Cattle to graze and water at the public Dams and Outspan Places in this District, contrary to the existing Law, requires all Field-cornets, Contractors, and others, strictly to attend to the Regulations on that subject, which are now published for General Information.

Civil Commissioner's Office,

Cape Town, 4th March 1837.

P. B. BORCHERDS, Civil Commissioner.

His Excellency the Governor and Commander in Chief has been pleased, at the recommendation of Landdrost and Heemraden of the Cape District, to approve of the following

REGULATIONS respecting the Fountains and Dams at the Public Uitspan Places in the Cape District.

Art. 1. As the keeping in repair of the Fountains and Dams at the different Uitspan Places, has been paid out of the produce of the Tolls, and given out for Contract by Government, necessity now requires, that proper measures should be taken for the prevention of all wilful destruction, and bad uses, the following Regulations are therefore prescribed

2. No Person shall approach the upper or South-east side of the Dams, in order to prevent the same from being dirtied by the sand, on pain of being fined in a penalty of Rds. 5, for the first time, 10 for the second, and 15 for the third; one half for the School Fund, of the Cape District, and the other for the Contractors of such Dam or Fountain, over and above the action of the Landdrost.

3. The Wagons, to be unyoked at the Uitspan Places, shall pay strict attention that such be done at a distance of no less than 40 paces from the Dam, under the Wind; while the Field-cornet, finding that such is not observed, shall have the right to pound the Cattle, till report be made thereof to the Landdrost; as the Offenders will fall in a penalty of Rds. 10, for the first time, 15 for the second, and 20 for the third, to be divided as above, over and above the Action of the Landdrost.

4. They shall also take proper care, that no wood, bushes, or rushes, be destroyed or cut in the vicinity of the Uitspan Places, by which the ground being loosened, they may become exposed to be dirtied by the sand, on pain of such penalty, and on behalf of such, as mentioned in Art. 3.

5. In order to provide Hogs, Poultry, &c. with the necessary water, they shall not let the same drink nor swim in the Dam, but take the water required for drinking out of it; while the Field-cornet is also directed to watch over the same, on pain of the penalty specified in Art. 3.

6. Nobody shall wash any goods in the Dam, but also take out the water for that purpose, on pain of the said penalty, to be divided as above stated.

7. The Inhabitants shall particularly direct their Drivers or Herdsmen, to take care, that after the unyoking of more than one Wagon, all the Cattle do not go together to the Water, as by a multiplicity, the Dam would be entirely trodden down and destroyed.

8. No Inhabitants, living in the Plains, or elsewhere, and having contracted with the Butchers for the grazing of their Cattle, shall make use of the Water or Pasturage of the Public Uitspan Places, but provide the Cattle contracted for with the same at their own Places; while the use of the Water and Pasturage of the Public Uitspan Places is only to be allowed to travelling persons; all under such penalty and on behalf of such, as is stated in said Art. 3.

9. No Field in the vicinity of the Public Uitspan Places

shall be set on fire under whatever pretext, while he being convicted thereof, shall be proceeded against by the Magistrate, without respect of Persons.

10. None of the neighbouring places shall assume any right to the Water or Pasturage of the Public Uitspan Places, on pain of the above-mentioned penalty; the use whereof being hereby expressly forbidden; and it is also particularly recommended to the attention of the Field-cornet, carefully to watch over the same, and take such Cattle as are found at the said Uitspan Places immediately under his charge, till the same, after the payment of the above penalties and expenses of the Pound, shall be redeemed by the Owner or Owners; for the receipt of which the Field-cornet is hereby qualified, and whereof he is to keep proper annotation, for the information of the Landdrost; and for the prompt maintenance of this Art., every Inhabitant whomsoever is hereby qualified, to send such Cattle as may be found there to the Pound.

11. The Inhabitants, at the unyoking, finding that the Dams are not clean or destroyed, shall give notice hereof to the Field-cornet of the District, who is obliged to inform the Contractors of it, in order to take immediate precautions, and they, after such information, delaying longer than 48 hours so to do, the Field-cornet shall send in a written report thereof to the Landdrost's Office, in order that the necessary measures may be taken accordingly.

12. Finally, the respective Field-cornets of the several Districts are directed to pay attention, that the tenor of these Regulations be strictly complied with, in order thereby to secure to the public, in the transport of their produce, the uninterrupted enjoyment of those so necessary Uitspan Places. The Field-cornets being ordered communicatively to inspect the state of the New Dams with the Contractors, in order immediately to repair the damages occasioned to the same.

And in order to prevent these Regulations from being transgressed, every Person is hereby requested (and if necessary) directed, seriously to warn their subjects or wagondrivers, strictly to observe these Regulations, as the Owner or Owners of such will be responsible for the above-mentioned Penalty, from whom the same will be recovered.
Cape Town, 23d Feb. 1837.

By order of Landdrost and Heemraden aforesaid,
(Signed) **J. J. L. SMUTS**, Sec.

INFLAMMATION AND DEATH.

(FROM THE "TIMES" OF SATURDAY, NOV. 28, 1835.)—Yesterday evening an inquest was held at the Sovereign, Munster-street, Regent's park, before Mr. Stirling, on view of the body of Mrs. Sarah Porter, aged 35, of Clarence gardens, Regent's-park. Dr. Johnson, Physician Extraordinary to the King, deposed that he attended the post-mortem examination of the body, and was of opinion that death was occasioned by inflammation of the intestines, brought on by some irritable substance taken internally. Mr. Beale, Surgeon, of Long-acre, deposed, that he had attended the deceased several times. She was a very delicate woman. On the evening of the 23rd inst., witness was requested to attend her. On his arrival he found that she was in a state of delirium, and incapable of articulation. On inquiry, witness ascertained that the deceased had taken several doses of "Morison's pills." She continued to get worse, being violently affected; on the 22d, she became somewhat sensible, complaining of violent pains in the bowels; on the 23d all symptoms became aggravated, and she died on the evening of the same day. Witness concurs in the opinion of Dr. Johnson, that the death of the deceased was caused by inflammation of the intestines, brought on by the administration of some violent medicine. Sarah Paine, servant to the deceased, proved having purchased three separate boxes of "Morison's pills," at No. 43, Munster-street, which were taken by her mistress in doses of fourteen and sixteen at a time. Other relatives of the deceased were examined, who stated that the deceased was advised to take the pills by a Mrs. Robinson, a neighbour; but she (deceased) becoming worse, they advised her not to take more. The jury severely animadverted on the sale of the pills in question, and after some discussion returned a verdict, "That the deceased died from inflammation of the intestines, caused by taking Morison's pills."

HEALTH AND HAPPINESS.

"Methinks I've cast full twenty years aside,
And am again a boy. Every breath
Of air that trembles through the window bears
Unusual odour."
PROCTOR—"MIRANDOL."

IMPORTANT TO THE AFFLICTED.—The unprecedented success which has resulted from the adoption of Brandreth's Pills, during a period of upwards of 80 years—the numerous and extraordinary cures which they have performed upon hundreds of individuals whom they have rescued from almost inevitable death, after they had been pronounced incurable by the most eminent of the faculty—justify the proprietors of this "Original Vegetable Universal Medicine" in warmly and conscientiously recommending it to the especial notice of the public. Unlike numerous Medicines, of high pretensions and FATAL EFFECTS—the "kill or cure" instruments of ignorant empirics—which are daily sent forth to gull and delude the public, these Pills may be taken with perfect safety by even children of the most tender years; the doses being regulated (for which see the Directions accompanying the Medicines) according to the age of the patient. Ignorant pretenders to the science of medicine, in order to increase the consumption of their deadly compounds recommend to their deluded victims doses in a dangerous and almost unlimited quantity!! The result of the overweening confidence of their doubly afflicted patients (who are thus induced to shorten their lives by taking their deadly advice, and swallowing their pills in these fatal quantities) may be traced in the verdicts of Coroner's Juries, who have publicly placed on record their opinions of the effects of Pills, composed of those highly dangerous ingredients, Gamboge and Bitter Aloes, by returning a verdict of manslaughter against the Venders.

ALL diseases arise from the one simple cause—an impurity in the blood, which impedes its circulation by settling on some organ or part, and immediately illness ensues. BRANDRETH'S PILLS correct, purify, and invigorate the blood, causing it to circulate freely; giving to every organ, healthy action. They are the Original Vegetable Medicine and have the highest claims on the patronage of a liberal and discerning Public; Dr. Brandreth, the original discoverer, not having decided on their present formula, until after thirty years' experience and laborious research into the medicinal properties of the numerous plants composing the Vegetable Kingdom: his object being to compose a pill that should at once purify and produce, by a specific action, an equalization of the circulating fluid; and whoever may feel disposed to give these Pills a trial, will, at once, find that this object is attained. They give immediate relief in all constipations of the bowels, spasmodic and bilious affections, flatulency, habitual costiveness, nervous and sick headache, arising from an overloaded condition of the digestive organs, viscera, &c., and the destruction of worms is speedily effected by them. Three or four weeks' use will eradicate scurvy, and all scorbutic humours, erysipelas, or St. Anthony's fire, and all cutaneous affections of the skin; and in diseases of the eyes, paralytic affections, asthma, dropsy, stone and gravel, piles, lumbago, affections of the kidneys, irritation of the bladder, urethra, rectum and spasmodic stricture, they are found invaluable. They also remove the innumerable train of evils to which females are subject at certain periods. Influenza is soon cured by these pills, and liability to it prevented. No mother of a family should be without a constant supply of this Domestic Medicine; they are most effective in their administration to children of the earliest age, when labouring under disease of any kind, especially whooping cough, dention, measles, scarlet fever, chicken pox, worms, tinea capitis or scald head, and all other eruptive diseases. As a medicine, to all individuals afflicted with either rheumatism or gout, it is truly invaluable; it not only eradicates, but by regularly taking it once or twice a-week, it will, most assuredly, prevent a return. Captains

and all voyagers will find this the medicine, without the aid of any other, to prevent costiveness, scurvy, and the various diseases incident to long voyages or foreign climates: it being unalterable by time or any atmospheric change. Brandreth's Pills are also a certain preventive of sea sickness, and are likewise the best medicine preparatory to sea bathing. After free living, three or four of these pills will prevent bilious attacks, and all unpleasant sensations.

THE TESTIMONIAL OF H. DEWHURST, Esq.

THEATRE OF ZOOLOGY, GOWER STREET, EUSTON SQUARE, LONDON, Jan. 10, 1834.

My Dear Sir,—As you have requested my candid opinion of your pills, I have much pleasure in stating, that when labouring under a serious illness in August 1831, I took them by your advice, and am happy to say, that their action was, in every way, all that I could desire; and, accordingly, from their use, I date my recovery. I consider them an excellent family medicine.

I remain, my dear Sir, yours truly,

H. W. DEWHURST, F. L. V. S.

Surgeon-Accoucheur, and Professor of Human and Zoological Anatomy, and Corr. Mem. Worces. Nat. His. Society.

From the OXFORD JOURNAL, Aug. 23, 1834.

BRANDRETH'S PILLS.—There are few who do not know that the essence of the food is converted into blood, which so formed, assimilates itself to the various ramifications of the human frame. We take it, therefore, as a clear axiom, that that medicine which makes the blood pure, without weakening the system, must be most excellent; and, as we know Brandreth's Pills to be such a medicine, we recommend them, with confidence, to our friends. Many and high are their testimonials.

From the OXFORD HERALD, August 23, 1834.

On all hands we hear of astonishing cures performed by Brandreth's Pills. Mr. Wilkins, of Magdalen College, was cured by them, of Ulcerated Legs in eleven weeks, which had been bad nine years. They cure by removing all noxious accumulations from the stomach and bowels, and all impurities from the blood; at the same time strengthening the frame: thus restoring the energies both of body and mind. We have ourselves taken them as an antibilious pill, and can, from experience, recommend them as such to our numerous friends.

To be had of every respectable Medicine vendor in the colony in boxes, 2s.—4s. 6d.—6s. 6d.—18s. each.

2. The Town including the Barrack Hill, shall be divided into Eight Wards.
3. There shall be seven Commissioners for the Municipality: And there shall be one Wardmaster appointed for each Ward, who shall be chosen and elected by a majority of inhabitants householders of each respective Ward.
4. The said Commissioners shall within one month after their nomination, and thereafter within one month from and after the 31st day of August in each year, cause a list to be framed, containing the names of all occupiers and proprietors of immoveable property within the aforesaid limits; and shall in each year, by public advertisement, call upon all persons liable to be assessed, to make a return of the rent, and yearly value of their immoveable property, and which notice shall be given at least fourteen days previously to the day appointed for the meeting of the Commissioners for the purpose of receiving such returns; and from the list and returns to be so framed, the said Commissioners shall forthwith make a roll of assessment, which shall become the roll of assessment upon which the rates on the immoveable property shall be levied. And if any person liable to assessment, shall fail to attend either by himself or his agent, to give all such information relative to his property as may be requisite to enable the said Commissioners to value the same; then it shall and may

BRANDRETH'S PILLS.

THE ORIGINAL VEGETABLE

Universal Medicine;

Established upwards of Eighty Years.

"Look here, upon this Picture and on this."—SHAKESPEARE.

INFLAMMATION AND DEATH.

(FROM THE "TIMES" OF SATURDAY, NOV. 28, 1835.)

"Yesterday evening an inquest was held at the Sovereign, Munster-street, Regent's park, before Mr. Stirling, on view of the body of Mrs. Sarah Porter, aged 35, of Clarence gardens, Regent's park. Dr. Johnson, Physician Extraordinary to the King, deposed that he attended the post-mortem examination of the body, and was of opinion that death was occasioned by inflammation of the intestines, brought on by some irritable substance taken internally. Mr. Leale, Surgeon, of Long-acre, deposed, that he had attended the deceased several times. She was a very delicate woman. On the evening of the 24th inst., witness was requested to attend her. On his arrival he found that she was in a state of delirium, and incapable of articulation. On inquiry, witness ascertained that the deceased had taken several doses of 'Morrison's Pills.' She continued to get worse, being violently affected; on the 22d, she became somewhat sensible, complaining of violent pains in the bowels; on the 23d all symptoms became aggravated, and she died on the evening of the same day. Witness concurs in the opinion of Dr. Johnson, that the death of the deceased was caused by inflammation of the intestines, brought on by the administration of some violent medicine. Sarah Paine, servant to the deceased, proved having purchased three separate boxes of 'Morrison's Pills,' at No. 43, Munster-street, which were taken by her mistress in doses of fourteen and sixteen at a time. Other relatives of the deceased were examined, who stated that the deceased was advised to take the pills by a Mrs. Robinson, a neighbour; but she (deceased) becoming worse, they advised her not to take more. The jury severely animadverted on the sale of the pills in question, and after some discussion returned a verdict, 'That the deceased died from inflammation of the intestines, caused by taking Morrison's Pills.'

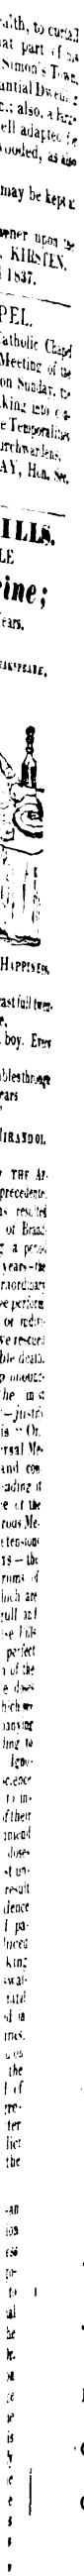

HEALTH AND HAPPINESS.

"Methinks I've cast full twenty years aside,
"And am again a boy. Every breath
"Of air that trembles through the window bears
"Unusual odour."
FROCTOR—"MIRANDOL."

IMPORTANT TO THE AFFLICTED.

The unprecedented success which has resulted from the adoption of Brandreth's Pills, during a period of upwards of 80 years—the numerous and extraordinary cures which they have performed upon hundreds of individuals who have rescued from almost inevitable death, after they had been pronounced incurable by the most eminent of the faculty—justify the proprietors of this "Original Vegetable Universal Medicine" in warmly and conscientiously recommending it to the especial notice of the public. Unlike numerous Medicines, of high pretensions and FATAL EFFECTS—the "kill or cure" nostrums of ignorant empirics—which are daily sent forth to gull and delude the public, these Pills may be taken with perfect safety by even children of the most tender years; the doses being regulated (for which see the Directions accompanying the Medicines) according to the age of the patient. Ignorant pretenders to the science of medicine, in order to increase the consumption of their dearest compounds recommend to their deluded victims doses in a dangerous and almost unlimited quantity!! The result of the overweening confidence of their doubly afflicted patients (who are thus induced to shorten their lives by taking their deadly advice, and swallowing their pills in these fatal quantities) may be traced in the verdicts of Coroners' Juries, who have publicly placed on record their opinions of the effects of Pills, composed of those highly dangerous ingredients, Gamboge and Bitter Aloes, by returning a verdict of manslaughter against the Venders.

ALL diseases arise from the one simple cause—an impurity in the blood, which impedes its circulation by settling on some organ or part, and immediately illness ensues. BRANDRETH'S PILLS correct, purify, and invigorate the blood, causing it to circulate freely; giving to every organ, healthy action. They give immediate relief in all constipations of the bowels, spasmodic and bilious affections, flatulency,

"Look here, upon this Picture and on this."—SHAKESPEARE.

INFLAMMATION AND DEATH.

(FROM THE "TIMES" OF SATURDAY, NOV. 28, 1835.)—"Yesterday evening an inquest was held at the Sovereign, Munster-street, Regent's park, before Mr. Stirling, on view of the body of Mrs. Sarah Porter, aged 35, of Clarence gardens, Regent's-park. Dr. Johnson, Physician Extraordinary to the King, deposed that he attended the post-mortem examination of the body, and was of opinion that death was occasioned by inflammation of the intestines, brought on by some irritable substance taken internally. Mr. Beale, Surgeon, of Long-acre, deposed, that he had attended the deceased several times. She was a very delicate woman. On the evening of the 20th inst., witness was requested to attend her. On his arrival he found that she was in a state of delirium, and incapable of articulation. On inquiry, witness ascertained that the deceased had taken several doses of "Morison's Pills." She continued to get worse, being violently affected; on the 22d, she became somewhat sensible, complaining of violent pains in the bowels; on the 23d all symptoms became aggravated, and she died on the evening of the same day. Witness concurs in the opinion of Dr. Johnson, that the death of the deceased was caused by inflammation of the intestines, brought on by the administration of some violent medicine. Sarah Paine, servant to the deceased, proved having purchased three separate boxes of "Morison's Pills," at No. 43, Munster-street, which were taken by her mistress in doses of fourteen and sixteen at a time. Other relatives of the deceased were examined, who stated that the deceased was advised to take the pill by a Mrs. Robinson, a neighbour; but she (deceased) becoming worse, they advised her not to take more. The jury severely animadverted on the sale of the pills in question, and after some discussion returned a verdict, "That the deceased died from inflammation of the intestines, caused by taking Morison's Pills."

ALL diseases arise from the one simple cause—an impurity in the blood, which impedes its circulation by settling on some organ or part, and immediately illness ensues. BRANDRETH'S PILLS correct, purify, and invigorate the blood, causing it to circulate freely; giving to every organ, healthy action. They are the Original Vegetable Medicine and have the highest claims on the patronage of a liberal and discerning Public; Dr. Brandreth, the original discoverer, not having decided on their present formula, until after thirty years' experience and laborious research into the medicinal properties of the numerous plants composing the Vegetable Kingdom: his object being to compose a pill that should at once purify and produce, by a specific action, an equalization of the circulating fluid; and whoever may feel disposed to give these Pills a trial, will, at once, find that this object is attained. They give immediate relief in all constipations of the bowels, spasmodic and bilious affections, flatulency, habitual costiveness, nervous and sick headache, arising from an overloaded condition of the digestive organs, viscera, &c., and the destruction of worms is speedily effected by them. Three or four weeks' use will eradicate scurvy, and all scorbutic humours, erysipelas, or St. Anthony's fire, and all cutaneous affections of the skin; and in diseases of the eyes, paralytic affections, asthma, dropsy, stone and gravel, piles, lumbago, affections of the kidneys, irritation of the bladder, urethra, rectum and spasmodic stricture, they are found invaluable. They also remove the innumerable train of evils to which females are subject at certain periods. Influenza is soon cured by these pills, and liability to it prevented. No mother of a family should be without a constant supply of this Domestic Medicine; they are most effective in their administration to children of the earliest age, when labouring under disease of any kind, especially hooping cough, dentition, measles, scarlet fever, chicken pox, worms, tinea capitis or scald head, and all other eruptive diseases. As a medicine, to all individuals afflicted with either rheumatism or gout, it is truly invaluable; it not only eradicates, but by regularly taking it once or twice a-week, it will, most assuredly, prevent a return. Captains and all voyagers will find this the medicine, without the aid of any other, to prevent costiveness, scurvy, and the

IMPORTANT TO THE AFFLICTED.—The unprecedented success which has resulted from the adoption of Brandreth's Pills, during a period of upwards of 80 years—the numerous and extraordinary cures which they have performed upon hundreds of individuals whom they have rescued from almost inevitable death, after they had been pronounced incurable by the most eminent of the faculty—justify the proprietors of this "Original Vegetable Universal Medicine" in warmly and conscientiously recommending it to the especial notice of the public. Unlike numerous Medicines, of high pretensions and FATAL EFFECTS—the "kill or cure" nostrums of ignorant empirics—which are daily sent forth to gull and delude the public, these Pills may be taken with perfect safety by even children of the most tender years; the doses being regulated (for which see the Directions accompanying the Medicines) according to the age of the patient. Ignorant pretenders to the science of medicine, in order to increase the consumption of their deadly compounds recommend to their deluded victims doses in a dangerous and almost unlimited quantity!! The result of the overweening confidence of their doubly afflicted patients (who are thus induced to shorten their lives by taking their deadly advice, and swallowing their pills in these fatal quantities) may be traced in the verdicts of Coroners' Jurors, who have publicly placed on record their opinions of the effects of Pills, composed of those highly dangerous ingredients, Gamboge and Bitter Aloes, by returning a verdict of manslaughter against the Vendors.

various diseases incident to long voyages or foreign climates: it being unalterable by time or any atmospheric change. Brandreth's Pills are also a certain preventive of sea sickness, and are likewise the best medicine preparatory to sea bathing. After free living, three or four of these pills will prevent bilious attacks, and all unpleasant sensations.

THE TESTIMONIAL OF H. W. DEWHURST, Esq.
THEATRE OF ZOOLOGY, GOWER STREET, LUSTON SQUARE,
DR. BRANDRETH.
London, Jan. 10, 1834.

My Dear Sir,—As you have requested my candid opinion of your pills, I have much pleasure in stating, that when labouring under a serious illness in August 1831, I took them by your advice, and am happy to say, that their action was, in every way, all that I could desire; and, accordingly, from their use, I date my recovery. I consider them an excellent family medicine.

I remain, my dear Sir, yours truly,
H. W. DEWHURST, F. L. V. S.
Surgeon-Accoucheur, and Professor of Human and Zoological Anatomy, and Corr. Mem. Worces. Nat. His. Society.

From the OXFORD JOURNAL, Aug. 23, 1834.
BRANDRETH'S PILLS.—There are few who do not know that the essence of the food is converted into blood, which so formed, assimilates itself to the various ramifications of the human frame. We take it, therefore, as a clear axiom, that that medicine which makes the blood pure, without weakening the system, must be most excellent; and, as we know Brandreth's Pills to be such a medicine, we recommend them, with confidence, to our friends. Many and high are their testimonials.

From the OXFORD HERALD, August 23, 1834.
On all hands we hear of astonishing cures performed by Brandreth's Pills. Mr. Wilkins, of Magdalen College, was cured by them, of Ulcerated Legs in eleven weeks, which had been bad nine years. They cure by removing all noxious accumulations from the stomach and bowels, and all impurities from the blood, at the same time strengthening the frame: thus restoring the energies both of body and mind. We have ourselves taken them as an antibilious pill, and can, from experience, recommend them as such to our numerous friends.

To be had of every respectable Medicine vendor in the colony in boxes, 2s.—4s. 6d.—6s. 6d.—18s. each

NAVIGATION—KANGAROO ISLAND.

(Communicated by Capt. CAREW.)

(COPY)

"*Eagle*," *Gage's Roads*, March 6, 1836.

SIR,—Agreeably to your request I send you the Latitude and Longitude of a Reef of Rocks, off Kangaroo Island, which I supposed to be the same named "Brockman's Breakers;" by a good observation of the sun we made the latitude $36^{\circ} 20'$ south, longitude by the chronometer $187^{\circ} 5'$.

During this voyage we have passed a reef off the land about 7 or 8 miles, running about N. and S. in latitude $37^{\circ} 0'$ —the extent of the reef was about 4 or 5 miles.

Off the north island of Gambier's Group, in Spencer's Gulf, there is a reef of rocks running N. and S. from the west side of the island, at least 7 miles long. I have only a recent general chart upon which no such reefs are laid down.

I am, Sir, &c.

(Signed)

C. PRATT.

The Honorable J. S. Ross, Esq.

P.S. We passed between the North Island and Staple's Island, or the Easternmost Island,—that is the sailors' name, as well as Wedge Island,—which is a good and safe passage with not less than $1\frac{1}{2}$ fathoms water through.

Mem. of Reefs seen to the South of Kangaroo Island, by the barque "*Lonach*," W. A. Driscoll, Commander.

Monday (N. T.) 14th April 1834.

Midnight.—Just as the watch was about to be relieved I was aroused by the cry—"We are among the breakers." On coming on deck I observed them about 3 points before the beam at a distance of a few cables' length. We were then on a wind, the ship's head W. by N.—hove all a-back and stood to the S. and Eastward for 20 minutes, when the cry was repeated—"We are going on the land." In vain I tried to see it, but could not. Still as the cry continued, I thought it but prudent to have her again in stays. Our head W.N.W. we then closed very rapidly what we had first seen—made another short board to the South and Eastward, and then again to the W.N.W. keeping a good look-out—weathered the rocks a short half mile, one of which appeared some height out of the water. The spray was like a column of smoke, as high as our top-mast-head. The weather was, with a moderate top-gallant breeze. From the strong ripple on the water, I should say that there was a strong set to the northward, and perhaps to the eastward; but not having had observations the two preceding days, I could not positively state this to be the case. Daylight saw the land low and even, the centre bearing N. by W. distant 11 or 12 miles. At 6 15 a.m. it became clearer, when we perceived a low islet bearing N.W. by N. about $1\frac{1}{2}$ or 2 miles from the cape or headland.

Lat. at noon $36^{\circ} 9' 11''$ South; and long. (admitting Cape Onay to be in $143^{\circ} 32'$ East) $136^{\circ} 35'$ East.

We had run 44 miles W. $\frac{1}{2}$ N.; but as I before stated, some allowance must be made for a current. My opinion is, that it sets strong to the Northward, I think it would be advisable

for Commanders to keep a good look-out in approaching this land. This rock is not noticed in Flinder's, or I should imagine very incorrectly laid down.

Schooner "*Eagle*," Capt. JOHN BROCKMAN.

21st Dec. 1831, noon—lat. $36^{\circ} 17'$ S.; long. by a good chronometer 23 days from Hobart Town, $137^{\circ} 21'$ E.—saw heavy breakers from mast-head bearing S. by E. $\frac{1}{2}$ E. by compass distant about 25 or 30 miles (the weather very clear), and another patch W.S.W. about the same distance. Next day the schooner was within 4 or 5 miles of these dangers, and observed the southern patch of reef to be about 3 or 4 miles in length, with several small rocks a few feet above the water's edge scattered upon it. The western reef was somewhat smaller in size, but with dry rocks upon it similar to the other. The breakers upon both were very high, and there appeared a clear passage between them about a mile wide.

22d Dec. 1831.—Having hove-to during last night in consequence of the vicinity of the above reef, at daylight found the schooner within $\frac{1}{2}$ mile of another reef of rocks, partly dry, about 100 yards in length. This danger appears to lie about 10 miles from the nearest part of Kangaroo Island, and in the parallel of the west end of the island. No soundings were taken while in sight of these reefs, as the water appeared deep all around. At noon of the 22d, the southern reefs were not in sight, nor could any part of Kangaroo Island be seen from the schooner's mast-head, when she was near them on the morning of the 22d; they must therefore lie near 60 miles from the south side of the Kangaroo Island.

(Signed)

JOHN BROCKMAN,
Master, Schooner "*Eagle*."

DANGERS OFF THE SOUTH-WESTERN COASTS OF AUSTRALIA.

Mande's Reef, off King George's Sound—about a quarter of a mile in diameter; centre in lat. 35.13 S.; long. 117.57 E. on Flinder's chart, according to the following bearings of the land—

From Baldhead extremity S.W. by S. by compass.
— Eclipse Island summit E.S.E.
— Peak Head ditto S. $\frac{1}{2}$ E.
— Vancouver's Reef S.S.W. $\frac{1}{2}$ W.

Soundings in 45 fathoms shells, sand, stones, and coral, 2 $\frac{1}{2}$ miles S.E. from Mande's Reef;—44 fathoms, coarse sand and shells $2\frac{1}{2}$ miles S.E. by S. from do.;—47 fathoms, coarse speckled sand, with coral $3\frac{1}{2}$ miles S. by E. $\frac{1}{2}$ E. from do.;—apparently 3 or 4 fathoms, on the shoalest part at low water, as the sea breaks on it only at times, when the water is low and a heavy sea running.

Coventry Reef, off Cape Peron—bears from the N.W. corner of Cape Peron S.W. $\frac{1}{2}$ S. (mag.) distant about 4 $\frac{1}{2}$ miles; it is small and nearly awash, with apparently 7 to 10 fathoms all round. From Sandown on Garden Island (some remarkable white sand hills about $2\frac{1}{2}$ miles from its south end) Coventry Reef bears S. $18\frac{1}{2}$ W. (mag.) distant 8 miles.

Camarina Shoal— $2\frac{1}{2}$ miles W. $\frac{1}{2}$ N. (mag.) from the N.W. point of Garden Island has 6 or 7 feet water on its shoalest part. It is situated on the Five Fathom Bank westward of Garden Island, and has 10 fathoms water $\frac{1}{2}$ of a mile to the eastward, and $\frac{1}{2}$ a mile to the westward of it.

Seaward Reef—with 6 or 7 feet water upon it, is a small patch of rocks, on the Five Fathom Bank above referred to, and is situated $3\frac{1}{2}$ miles W. $\frac{1}{2}$ N. by compass, from the north end of Carnac Island, or in a line between the S. Weid of Rottnest and the Haycock on Garden Island, and in a line with Row-boat Rock and Arthur's Head at the entrance of the Swan River.

Half a mile E.N.E. from Seaward Reef is a shoal rocky patch of 2 fathoms, with 6 and $6\frac{1}{2}$ fathoms water between it and the reef.

The Rambler (off Cape Leeuwin)—reported to be a small cluster of rocks even with the water's edge, lying 12 or 15 miles W.S.W. by compass, from the remarkable white sand patch on the coast, 6 or 7 miles to the north of the S.W. extremity of Cape Leeuwin.

Note.—Experience having more recently shown that no reef exists in the position pointed out, the Rambler is probably the same as the *Géographe*.

Géographe Reef (off Cape Leeuwin)—bears S. 27 W. by compass, from the body of the remarkable sand-patch on the coast, to the northward of Cape Leeuwin. N. 55 W. by compass from the largest St. Alouar Island and N. 67 W. by compass from a small dark-coloured rock with a peaked summit. *Géographe* Reef appears to lie about 6 miles off the nearest land, and has 20 to 24 fathoms water at the distance of one-sixth of a mile on its S.W., West, and N.W. sides,—other reefs, partly dry, occupy a considerable portion of the space between it and the main; but the channels amongst them are probably foul and rocky. When the schooner *Ellen* passed close to the reef on 22d February 1835, the sea broke upon it only occasionally, when it appeared to be about $\frac{1}{2}$ mile in extent, N.N.W. and S.S.E. and 200 yards wide. The sea was very little discolored in its vicinity, and when not agitated would prevent the danger being seen at less than a cable's length. There may probably be less than 2 fathoms on some of its most elevated rocks.

Pollock's Reef.—(off the Recherche Archipelago)—bears S. $\frac{1}{2}$ W. by compass, distant 14 miles from S.E. Island of the Archipelago of Recherche.

Lat. by Flinder's chart 34.35 S.; long. 123.26 E. seen by the barque *Meropé*, Capt. Pollock, in March 1834, supposed to extend 8 or 10 miles eastward from the above position; but as the wind was blowing fresh from the W. at the time, and it broke only in one place, the remainder was probably its wake or stream.

Anchorage in Flinder's Bay, round the east side of Cape Leeuwin.—best anchorage for ships appears to be in about 7 fathoms stiff brown clay, with the flag-staff on Barrack Point W. $\frac{1}{2}$ N.; St. Alouar Island S. $\frac{1}{2}$ E.; and the extreme of the Mainland S.W. $\frac{1}{2}$ S. anchorage of H.M.S. *Sulphur*.

Naturaliste Reef (off Cape Naturaliste and *Géographe* Bay)—appears to be accurately placed on the French chart, 16 or 17 miles N. by E. by compass, from the extremity of Cape Naturaliste.

When seen from H. M. S. *Sulphur*, on the 31st Oct. 1831, its west end bore S. 10 W. (mag.) when in a line with the highest land over Cape Naturaliste, and the ship's head was W. by N. It consists of three patches of rocks, extending about $1\frac{1}{2}$ mile N.E. by E. and S.W. by W. with passages between them—13 fathoms water at 1 mile north from the reef—swell not very great at the time, and not constantly breaking. Capt. Hudson, of the *Orelia*, saw this reef in 1830, and set it in a line with extremity of Cape Naturaliste bearing S. by W. by compass, from which he considered it was distant 16 or 17 miles.

COMMERCIAL RETROSPECT.—Dec. 26.

As is usually the case at this season of the year, the Colonial Markets have been without any matter of public interest during the past week; the only circumstance worthy of remark is the rapid rise which has again taken place in Raw Sugar, and the great and general demand that has existed.

The Money market has been quiet this week, more quiet than last, and as the holidays are approaching it will be more quiet still. The price of English Securities was lower at the commencement of the week than at its termination. At one time, in the early part of the week, Consols were $88\frac{1}{2}$ $\frac{1}{2}$, but on Thursday they were $88\frac{1}{2}$ $\frac{1}{2}$; on Friday

they went down to $88\frac{1}{2}$ $\frac{1}{2}$, on Saturday they were $89\frac{1}{2}$, and $89\frac{1}{2}$ to-day. Exchequer Bills have been 16 18, which prices are higher than ever they have been since their conversion; to-day the quotation has been 18 20. Bank Stock has been 208 $\frac{1}{2}$ 209 $\frac{1}{2}$, which is not quite as good as last week. The 3 per Cents. Reduced have been 37 $\frac{1}{2}$.

We have it not yet in our power to state that there has been any increase of money in circulation for the great demands of our vast commerce. Complaints have been as great as ever, and discounts as high. The very circumstance of the Funds being at such comparatively high prices makes money scarce for mercantile purposes, as people with money prefer government securities to other investments at this crisis. When some of the papers say that there is more money in circulation, they can mean that there is more money on the Stock Exchange only.

The Foreign Securities have also been lower. Spanish have not touched above 20 $\frac{1}{2}$ as their highest price, and have been down to 19 $\frac{1}{2}$ $\frac{1}{2}$; to-day they have been 19 $\frac{1}{2}$.

We have still the great gratification to say that there are less symptoms of the prostration of public credit than ever. To us there never were such symptoms, but to others there were. We have laboured hard to disarm them of their fears by continually insisting that we should weather the storm without much damage. This week we have no failures to record of the slightest moment; and we are not to suppose that every body that fails now, fails because of our recent money derangement—persons would have failed if no such derangement had occurred, and some take the opportunity of this derangement to fail.

Remarks on the London Market.

New York papers to the 1st inst. received to-day, state that General Jackson was fast recovering from his indisposition. The total amount of United States' Exports, all articles of their own production during the year ending September 30, 1835, was 101,189,082 dollars, of which 64,964,302 were cotton, and 11,285,893 were Wheat, Flour, Rice, &c.; the rest sundries.

SUGAR.—The improvement noticed in the West India raw market on Tuesday last, both in the demand and prices, has continued throughout the week: the grocers as well as the refiners have purchased on a large scale, and the transactions are considerable at a further improvement in the value of 1s. 6d. to 2s. per cwt. making the rise since the late lowest point of the market is 3s. 6d. and in some instances 4s. per cwt.

MAURITIUS.—This description has participated in the improvement experienced in the West India market. No public sales have been brought forward, nor are there any advertised. The demand by private contract has been pretty good, principally for the good chiochery descriptions, and prices are about 1s. to 1s. 6d. per cwt. higher. No arrivals have been reported at the Custom House, but a vessel is off the coast.

The stock of B. P. is 32,617 hdds. and tierces, against 23,686 at the corresponding period of 1835, thus showing an increase of 8921 hdds. and tierces; the weekly deliveries are 2194 hdds. and tierces, against 1406 at the same time last year, thus showing an increase of 1088.

TEA.—The tone of the market has experienced a decided improvement: Bohea's are in extensive demand from 2s. 0d. to 2s. 1d. per lb. showing a premium of 1d. to 2d. per lb. upon the East India Company's quotations, and but few sellers at the advance: low Congous and Hysons are also inquired for.

SILK.—There continues to be more business doing in Italian, as well as East India descriptions, and at firmer prices, and altogether the market has a decidedly improved appearance.

OIL.—There is no material change in the market from last week, nor is there any now expected till the commencement of the new year. The home trade, who are still the only buyers in the market of Fish Oil, purchase but very small quantities, barely sufficient to meet their wants, at the quoted prices. In Rape Oil there has been scarcely anything done, whilst for Linseed Oil there has been rather more inquiry, and the holders are not inclined to sell except at a little improvement in the price. Palm Oil is taken off slowly at 32s. 6d. to 33s. per cwt.

At public sale on Friday last about 121 tons Sperm Oil of good quality was bought in at $\pounds 75$ a $\pounds 78$ per tun, and Head-matter at $\pounds 84$ per tun.

WHALE.—Whale and Seal Oils which in May 1835 sold at $\pounds 29$ per tun, are at present quoted at from $\pounds 56$ to $\pounds 59$ per tun, and will probably experience a still farther advance in consequence of 6 whalers being frozen up.—*Newcastle Journal*, Jan.

WOOL.—The market for Foreign kinds is looking more healthy, a rather better enquiry has been experienced, and for the small quantity that has been sold, fully late rates have been paid. An improvement of 1d. to 2d. per lb. has again taken place in English Wools, and the demand continues pretty good. The trade have at length fixed a time for the next public sales of Colonial Wool, it is from the 18th and the 24th of January next.

TALLOW.—We have to report a more animated market for Petersburg Yellow Candle Tallow; the demand for parcels on the spot is to a fair extent at 43s. 6d. to 43s. 6d. per cwt. for fine quality. The holders, however, evince little inclination to part with their stocks at present, and keep the market sparingly supplied.

HOPS.—The market remains much as last week; the prices present no variation.

Dec. 27.—The Snow which has fallen since Saturday has been deep in London and the Suburbs, but in the Country it has been very formidable indeed, more so than has been known for years. Of the Mails due yesterday, the following had not arrived when we went to press—The Dover, Brighton, Chester, Hastings, and Edinburgh. Of the Mails due last evening, the following had not arrived when we went to press—The Leeds, Liverpool, and Exeter. The Dover and Brighton Mails went out last night from London, but came back again, not being able to proceed.

No more Mails will be sent out until those which are due have arrived. The thaw has commenced in London to-day; and if it continues, the obstructions thrown in the way of intercourse by letters will soon be removed, and until that be the case, great inconvenience will be experienced. The obstruction, however, happens at a time when the Commercial world is very dead, and under these circumstances less evil will be inflicted and less inconvenience created.

Half-past Six.—Twenty seven Mails due at the General Post Office.

WILLIAM THE FOURTH, by the Grace of God, of the United Kingdom of Great Britain and Ireland, King, Defender of the Faith, to the Sheriff of the Colony of the Cape of Good Hope, or his lawful Deputy, Greeting.

WHEREAS upon the Petition to the Honorable Sir JOHN WYLDE, Knight, LL.D. Chief Justice, and other the Judges of the Supreme Court of our said Colony, of Edward Eagar, of Cape Town, Merchant, one of, and as acting on behalf of Charles Home and Robert Eagar, the sole other partners in the firm of Home, Eagar, & Co. Merchants, Cape Town, against John Dunn, of Worcester, Hawker or Vender of Wares and Merchandizes, it appears to us that the said John Dunn is justly and truly indebted to the said Charles Home, Edward Eagar, and Robert Eagar, trading as aforesaid, in the Sum of Nine Hundred and Twenty pounds of lawful money, upon and by virtue of a certain Mortgage Bond made and passed by him before the Notary Alexander Hutchinson, and Witnesses, on the Twenty-second day of November 1836, together with Interest due thereupon.

That on the Twenty-third day of November last, William Homewood, of Cape Town, Merchant, issued a Summons returnable on the First day of February last in the Supreme Court, against the said John Dunn, for payment of the Sum of £272 17 9, upon and by virtue of a certain Promissory Note therein mentioned, and which Summons was caused to be served personally on the said John Dunn. That on the said First day of February last, the said William Homewood obtained a Provisional Sentence thereupon against the said John Dunn. That a Writ of Execution was thereupon sued out and a return of *nulla bona* has been endorsed thereon by the High Sheriff. And further that the said John Dunn undertook to be in Cape Town, to pay said debts on or before the 31st January last, but has not only neglected to do so, but has for a considerable time past absented himself from his residence at Worcester, or otherwise absented himself, or remains absent, with intent to defeat or delay, and is actually defeating or delaying the said firm of Home, Eagar, & Co. or other his Creditors, in obtaining payment of their just debts, to them due, and owing and by reason of the premises, has committed an

Act or Acts of Insolvency, whereupon the said Edward Eagar, acting on behalf aforesaid, prayed that the Estate of the said John Dunn might be sequestrated for the benefit of his Creditors.

And whereas it further appears to us of record, that the Honorable William Menzies, Senior, Puisne Judge of the Supreme Court of our said Colony, did, by order under his hand, bearing date the Seventeenth day of March instant, place the Estate of the said John Dunn under Sequestration in the hands of the Master of the said Court, until the same should be thereafter adjudged to be Sequestrated, or the said Petition should be discharged.

Now, therefore, We command you, that you Summon the said John Dunn, that he be and appear before our Justices of the Supreme Court, of our said Colony, at Cape Town, on the Eighteenth day of May next, at 10 o'clock in the Forenoon, to show cause, if he have any, why his Estate should not, by Sentence of the said Court, be adjudged to be Sequestrated for the benefit of his Creditors, and return you then and there this Writ, with whatsoever you have done thereupon.

Witness, Sir JOHN WYLDE, Knight, our Chief Justice of our said Colony, at Cape Town, on the 24th day of March 1837, in the Seventh Year of our Reign.

T. H. BOWLES,
Registrar of the Supreme Court.
ALEX. HUTCHINSON, No. 11, St. George's-street,
Cape Town, Plaintiff's Attorney.

*In the Supreme Court of the Colony
of the Cape of Good Hope.*

Cape Town, 12th April 1837.
WHEREAS on the Seventh day of May, in the year of our Lord One Thousand Eight Hundred and Thirty-five, the Estate of *Diederich Johan Richard Dekenh*, of the Cape District, was, by order of the Hon'ble Mr. Justice MENZIES, one of the Judges of this Court, placed under Sequestration in the hands of the Master of this Court, upon the Petition and Surrender of the said *Diederich Johan Richard Dekenh*.

And whereas the said *Diederich Johan Richard Dekenh* hath produced to this Court a Certificate, signed by four-fifths in number and value of the Creditors, who have proved Debts against his Estate, testifying their consent to his discharge from his Debts; and the said *Diederich Johan Richard Dekenh* hath made oath in writing, that such Consent and Certificate were obtained without fraud, and without his having used any undue means, or influence, or having made any secret compromise with his Creditors in order to obtain the same.

And whereas the said *Diederich Johan Richard Dekenh* hath applied to this Court, by motion, to have his Certificate allowed, and due notice having been given of the said motion in the *Government Gazette*, none of the Creditors of the said *Diederich Johan Richard Dekenh* have shown any objection thereto.

Now, therefore, the Court doth allow and confirm the said Certificate.

By the Court,
T. H. BOWLES, Registrar.

INFLAMMATION AND DEATH.

(FROM THE "TIMES" OF SATURDAY, NOV. 28, 1835.)—"Yesterday evening an inquest was held at the Sovereign, Munster-street, Regent's park, before Mr. Stirling, on view of the body of Mrs. Sarah Porter, aged 35, of Clarence garden, Regent's-park. Dr. Johnson, Physician Extraordinary to the King, deposed that he attended the post-mortem examination of the body, and was of opinion that death was occasioned by inflammation of the intestines, brought on by some irritable substance taken internally. Mr. Beale, Surgeon, of Long-acre, deposed, that he had attended the deceased several times. She was a very delicate woman. On the evening of the 24th inst., witness was requested to attend her. On his arrival he found that she was in a state of delirium, and incapable of articulation. On inquiry, witness ascertained that the deceased had taken several doses of "Morison's Pills." She continued to get worse, being violently affected; on the 22d, she became somewhat sensible, complaining of violent pains in the bowels; on the 23d all symptoms became aggravated, and she died on the evening of the same day. Witness concurs in the opinion of Dr. Johnson, that the death of the deceased was caused by inflammation of the intestines, brought on by the administration of some violent medicine. Sarah Paine, servant to the deceased, proved having purchased three separate boxes of "Morison's Pills," at No. 43, Munster-street, which were taken by her mistress in doses of fourteen and sixteen at a time. Other relatives of the deceased were examined, who stated that the deceased was advised to take the pill by a Mrs. Robinson, a neighbour; but she (deceased) becoming worse, they advised her not to take more. The jury severely animadverted on the sale of the pills in question, and after some discussion returned a verdict, "That the deceased died from inflammation of the intestines, caused by taking Morison's Pills."

ALL diseases arise from the one simple cause—an impurity in the blood, which impedes its circulation by settling on some organ or part, and immediately illness ensues. BRANDRETH'S PILLS correct, purify, and invigorate the blood, causing it to circulate freely; giving to every organ, healthy action. They are the Original Vegetable Medicine and have the highest claims on the patronage of a liberal and discerning Public; Dr. Brandreth, the original discoverer, not having decided on their present formula, until after thirty years' experience and laborious research into the medicinal properties of the numerous plants composing the Vegetable Kingdom: his object being to compose a pill that should at once purify and produce, by a specific action, an equalization of the circulating fluid; and whoever may feel disposed to give these Pills a trial, will, at once, find that this object is attained. They give immediate relief in all constipations of the bowels, spasmodic and bilious affections, flatulency, habitual costiveness, nervous and sick headache, arising from an overloaded condition of the digestive organs, viscera, &c., and the destruction of worms is speedily effected by them. Three or four weeks' use will eradicate scurvy, and all scorbutic humours, erysipelas, or St. Anthony's fire, and all cutaneous affections of the skin; and in diseases of the eyes, paralytic affections, asthma, dropsy, stone and gravel, piles, lumbago, affections of the kidneys, irritation of the bladder, urethra, rectum and spasmodic stricture, they are found invaluable. They also remove the innumerable train of evils to which females are subject at certain periods. Influenza is soon cured by these pills, and liability to it prevented. No mother of a family should be without a constant supply of this Domestic Medicine; they are most effective in their administration to children of the earliest age, when labouring under disease of any kind, especially whooping cough, dentition, measles, scarlet fever, chicken pox, worms, tinea capitis or scald head, and all other eruptive diseases. As a medicine, to all individuals afflicted with either rheumatism or gout, it is truly invaluable; it not only eradicates, but by regularly taking it once or twice a-week, it will, most assuredly, prevent a return. Captains and all voyagers will find this the medicine, without the aid of any other, to prevent costiveness, scurvy, and the various diseases incident to long voyages or foreign

IMPORTANT TO THE AFFLICTED.

The unprecedented success which has resulted from the adoption of Brandreth's Pills, during a period of upwards of 80 years—the numerous and extraordinary cures which they have performed upon hundreds of individuals whom they have rescued from almost inevitable death, after they had been pronounced incurable by the most eminent of the faculty—justify the proprietors of this "Original Vegetable Universal Medicine" in warmly and conscientiously recommending it to the especial notice of the public. Unlike numerous Medicines, of high pretensions and FATAL EFFECTS—the "kill or cure" nostrums of ignorant empirics—which are daily sent forth to gull and delude the public, these Pills may be taken with perfect safety by even children of the most tender years; the doses being regulated (for which see the Directions accompanying the Medicines) according to the age of the patient. Ignorant pretenders to the science of medicine, in order to increase the consumption of their deadly compounds recommend to their deluded victims doses in a dangerous and almost unlimited quantity!! The result of the overweening confidence of their doubly afflicted patients (who are thus induced to shorten their lives by taking their deadly advice, and swallowing their pills in these fatal quantities) may be traced in the verdicts of Coroners' Juries, who have publicly placed on record their opinions of the effects of Pills, composed of those highly dangerous ingredients, Gamboge and Bitter Aloes, by returning a verdict of manslaughter against the Venders.

climates: it being unalterable by time or any atmospheric change. Brandreth's Pills are also a certain preventive of sea sickness, and are likewise the best medicine preparatory to sea bathing. After free living, three or four of these pills will prevent bilious attacks, and all unpleasant sensations.

THE TESTIMONIAL OF H. W. DEWHURST, Esq.

THEATRE OF ZOOLOGY, GOWER STREET, LUSTON SQUARE, LONDON, Jan. 10, 1834.

My Dear Sir,—As you have requested my candid opinion of your pills, I have much pleasure in stating, that when labouring under a serious illness in August 1831, I took them by your advice, and am happy to say, that their action was, in every way, all that I could desire; and, accordingly, from their use, I date my recovery. I consider them an excellent family medicine.

I remain, my dear Sir, yours truly,

H. W. DEWHURST, F. L. V. S.

Surgeon-Accoucheur, and Professor of Human and Zoological Anatomy, and Corr. Mem. Worces. Nat. His. Society.

From the OXFORD JOURNAL, Aug. 23, 1834.

BRANDRETH'S PILLS.—There are few who do not know that the essence of the food is converted into blood, which so formed, assimilates itself to the various ramifications of the human frame. We take it, therefore, as a clear axiom, that that medicine which makes the blood pure, without weakening the system, must be most excellent; and, as we know Brandreth's Pills to be such a medicine, we recommend them, with confidence, to our friends. Many and high are their testimonials.

From the OXFORD HERALD, August 23, 1834.

On all hands we hear of astonishing cures performed by Brandreth's Pills. Mr. Wilkins, of Magdalen College, was cured by them, of Ulcerated Legs in eleven weeks, which had been bad nine years. They cure by removing all noxious accumulations from the stomach and bowels, and all impurities from the blood, at the same time strengthening the frame: thus restoring the energies both of body and mind. We have ourselves taken them as an antibilious pill, and can, from experience, recommend them as such to our numerous friends.

To be had of every respectable Medicine vendor in the colony in boxes, 2s.—4s. 6d.—6s. 6d.—18s. each.

COTTON.

We have great pleasure in laying before our readers the following letters, addressed by a gentleman at Bombay to Messrs. DICKSON, BURNIES, & Co., on a subject which we agree with the writer is well worthy the attention of the Farmers and Merchants of the Colony.

Bombay, 14th December 1836.

To Messrs. DICKSON, BURNIES, & Co.

DEAR GENTLEMEN:—In my former letters I have mentioned my belief that the *Cotton Plant* would thrive in the Colony; and the more I have reflected on it the more I feel convinced, that, with a little trouble at first to find out the proper season and the proper soil for planting, there cannot be a doubt but it will be found that the climate and soil of some, if not of all parts of the Colony, will produce as good cotton as Guzerat, or as Egypt, or America.

Having this in view, and knowing how zealously pursues any scheme which he may suppose will tend to the public good; and as he is moreover fond of, and has great knowledge in agricultural pursuits, I am in hopes, that through your exertions, the introduction of the growth of cotton may have a fair trial in the Colony.

To this end, I have shipped, in charge of Captain Kincaid, of the *William Nicol*, to your address, as follows:—

2 bags, each 1 cwt. of Guzerat cotton seed,
1 ditto 28 lbs. Egyptian ditto,
1 ditto 28 lbs. Sea Island ditto;

and a "Churkha," or machine used in Guzerat for separating the seed from the Cotton. This will, no doubt, appear to you a rude affair; but with such machines all the cotton imported from Bombay is cleaned; and this, you know, amounts to the value of many hundred thousand pounds sterling annually.

The Guzerat is grown as an annual; the Egyptian and Sea Island are perennial.

By last accounts from England, the following were the prices of these cottons:—

Guzerat, from 5½d. to 8½d. per lb.
Egyptian, — 14d. „ 18d. ditto,
Sea Island, — 22d. „ 34d. ditto.

If, therefore, the plant succeeds at the Cape, the reward to the cultivator and the field for the speculation of the merchant will be immense.

Unfortunately, I am but little acquainted with the soil and climate of the different districts of the Colony; but it appears to me that all "Zwartland" is eminently adapted for the cotton plants, especially the "Guzerat Annual;" but as on this subject you must be much better judges than I am, I need say nothing as to where it should be tried.

I however recommend that it be tried in small patches in as many different places as possible, and that some part of the seed be put in June, some in July, some in August, and some in September.

No particular care or labor is required beyond the following:—

The ground being previously well ploughed, and having had two, three, or more harrowings to pulverize the lumps, and well cleaned, the seeds are put with a rude drill used for the purpose, (I have sent to Guzerat for one,) at about one or two inches deep, and then the ground is bush-harrowed to cover over the seed.

After the first fall of rain, or if the atmosphere is moderately moist, or if there are dews, the plant will show above ground in from four to seven days. As the plants come up, the weaker ones are taken out so as to leave the stronger ones about one foot asunder.

The drills ought to be two feet apart, and care taken to keep the young plants clear of weeds.

It ripens in five months from first planting. The most favorable time for planting is after the ground has been well soaked with rain.

When the pod bursts and the cotton flows freely, select it carefully, so as to be free from dirt, broken leaves, or broken parts of the pod. It is picked from the pod with the hand, and deposited in a clean place: it is separated from the seed as soon as dry by passing it through the rollers of the machine I have sent.

Sometimes it is what is called "hand picked;" that is, the seeds are separated by the hand; but this is both tedious and expensive, though certainly the cotton so cleaned fetches a much higher price.

After the cotton is thus cleaned, it is packed in gunny bag bales, and sent to Bombay, when the bales are screwed tight for stowage on board ship.

What I have said above relates to the Guzerat seed; the Egyptian and Sea Island being perennials, and of course growing to large plants, require much more room. They should be planted in trenches; probably the best plan would be to try them in Gardens.

From the prices which these cottons fetch, it will, I hope, show the cultivator the profit he may expect to derive from any care that may be required in rearing the plant; and be an inducement for some to persevere in giving it a fair trial.

The cotton raised from the trial had better be sent to England, in order to have a report on it.

Should the experiment succeed, and people are required to carry forward the business on an extensive scale, I have no doubt of being able to induce a few families to emigrate from Guzerat to the Cape, who would be most useful in instructing the farmers, as well as in packing the cotton.

I confidently trust, that every farmer will most readily lend his aid in furtherance of the experiment; and that no one will refuse the use of such small patches of land (perhaps not ten yards square each,) which may fix on for his trials. Towards effecting the object in view, I shall most willingly bear all expenses, provided will undertake the trouble of superintending the experiments; and I trust we shall all be amply rewarded by the gratification of seeing the Cape exporting the largest quantity of the best cotton in the world.

Should it succeed, seed to any quantity can be had from hence to set all those farmers to work who may wish to make their fortunes. And assuredly, if it should happily be found that the plant will thrive, its cultivation must do more good to the Colony than any thing that has yet been tried.

What I am most afraid of is, the frost, which is a great enemy to the plant, and it will be requisite to try it on those parts, or at seasons when it will be least liable to it.

It does not require much rain, provided the ground when the seed is put in, the dews or occasional showers will bring it forward and the heat of your sun ripen it.

I have greater hopes of the seed put in in September than any other month, provided the ground be damp at first.

I shall send down the drill I have alluded to as soon as I receive it from Guzerat, and probably I may send a little more seed, though I should hope, what I have now sent may be sufficient for the trial.

I remain, dear Gentlemen,

Your's very faithfully,

W. HENDERSON.

Bombay, 31st January, 1837.

To Messrs. DICKSON, BURNIES, & Co.

Cape of Good Hope.

DEAR GENTS.

As mentioned in my letter of the 14th Dec. on the subject of the growth of cotton at the Cape, I have now the pleasure to forward by the *Carnatic*, Capt. Brodie, three bags of the Guzerat seed, to your address, marked No. 1, 2, 3, which, with what I before dispatched by the *Nichol*, will, I trust, be sufficient to give it a fair trial over the Colony. The Rude Drill, alluded to by me in the letter above quoted, is also sent, marked No. 4. It consists of a sort of cup and two hollow Bamboos. I am sorry I cannot send the drill plough; it has two shares, or rather scratchers, which penetrate the earth one or two inches, at about two feet apart. The cup is fixed on the plough, the two bamboos inserted into it, and their lower ends come down right behind the shares, thus—

A man with a bag of seed follows the drill plough, and keeps filling the cup, the seeds being dropped behind the share through the hollow bamboo.

In a post-script to my last letter I mentioned LINSEED, the cultivation of which was attracting attention here in consequence of the great demand for it in England, where it fetches a very high price, which you may ascertain with reference to the Price Currents.

I am not aware of the plant being cultivated at the Cape, or if it is, whether it is the same as that which produces the seed for export from this. Supposing that it is not, I have procured and now forward along with the cotton seed, two bags of 60lb. each, marked L. Seed, No. 1, 2.

From the peculiar ease with which it is reared here, and from the circumstances of the Farmers obtaining crops during any part of the dry season, from September till June, I am led to hope that it will thrive in most parts of the Colony.

Here the uninitiated Farmer raises the plant merely and entirely on account of the Seed. The name of *Flax* even is unknown to him: and after the seed is gathered, the stalk is rejected and thrown away as utterly useless and of no account.

For the first crop of the season, the seed is sown in good soil, about the middle of October, which is immediately after the rainy season, when of course the ground has been well saturated with rain. The land is well cleared of all weeds or grass well ploughed over once or twice and prepared for the drill. The seed is then sown in rows with the rude drill.

It requires no further supply of water than the moisture contained in the ground after the rains, and the occasional dews of the cold mornings; for in the part of the country I allude to, the nights and mornings are very cold after October, and thin ice not unfrequent. The only thing the farmer is particular about, is the keeping his field tolerably clear of grass or weeds as the plant grows. It reaches maturity in about four months.

The next crop is sown about March, when the ground is parched and the heat of the sun very powerful. It of course requires irrigation, which it gets every three or four days. The stalk of this crop is longer than the first,—seed less.

I do think there can be little doubt but this plant will thrive well in the colony. It has occurred to me that there are many parts of the Cape Flats or Downs peculiarly well adapted for plants of that description. The only thing I should fear would be, that if it were sown in too damp a spot, it would run too much to stalk, and produce less seed: and as seed and not flax is required,—defeat the object for which it is intended. Altogether, however, I consider it well worthy the attention both of the merchant and agriculturist; and if it succeeds, likely to add considerably to the trade of the colony.

In furtherance of the good cause, I have thought of our plant the "Sun," which affords such a lengthy stalk for strong cordage for gunny bagging, and cotton bale lashings.

The plant grows to about five or six feet high, and the fibre is uncommonly strong and lasting. It is planted here during the rains, and I therefore think it would prosper well on such part of the Flats as may be too moist for the linseed. Some seed is now on the way here, but as it cannot reach before the *Carnatic* sails, I shall send it by another opportunity.

Now, that the Cape is at last making a start towards improvement, with her fine-wooled sheep, her Joint Stock Bank, her steam-boat, &c. I trust she will carry on by setting to work in using every effort towards introducing such articles for cultivation as will benefit her farmers, her merchants, and her population generally, and that she will not allow herself to be outdone by the colonies to the eastward. Capital she will soon have, more than enough for every purpose; all that can be required is, employment for that capital in a way which will ensure the holder a safe and advantageous return for his money.

In as far as the productions of the soil are concerned for this purpose, I doubt not the chamber of commerce and the Agricultural Society will lend their powerful aid. These combined with the assistance which the industrious agriculturist may expect from the Bank, will, I should hope, in a short period of years, most materially improve the condition of the colony in every respect.

That it may be so is the sincere wish of

Dear Gents,

Your's most faithfully,

W. HENDERSON.

P.S. Most fortunately I have got ready the following models of implements of husbandry used in cotton cultivation:

1.—The Plough in general use over this part of India.
2.—The Drill Plough.
3.—The Grubber used for eradicating grass and weeds between the drills.

These models of implements are not made in proportion, but will serve to show what sort of assistance the farmer of this country has in cultivating the soil. Perhaps they may be acceptable for the museum of your Agricultural Society.

The whole are packed up in No. 4.

Most opportunely the bag of seed of the "Sun" has just arrived and is sent off to the ship: it is marked No. 5, but not included in bill of lading.

BRANDRETH'S PILLS.

THE ORIGINAL VEGETABLE

Universal Medicine;

Established upwards of Eighty Years.

"Look here, upon this Picture and on this."—SHAKESPEARE.

INFLAMMATION AND DEATH.

(FROM THE "TIMES" OF SATURDAY, NOV. 28, 1835.)—"Yesterday evening an inquest was held at the Sovereign, Munster-street, Regent's park, before Mr. Stirling, on view of the body of Mrs. Sarah Porter, aged 35, of Clarence gardens, Regent's-park. Dr. Johnson, Physician Extraordinary to the King, deposed that he attended the post-mortem examination of the body, and was of opinion that death was occasioned by inflammation of the intestines, brought on by some irritable substance taken internally. Mr. Peale, Surgeon, of Long-acre, deposed, that he had attended the deceased several times. She was a very delicate woman. On the evening of the 23rd inst., witness was requested to attend her. On his arrival he found that she was in a state of delirium, and incapable of articulation. On inquiry, witness ascertained that the deceased had taken several doses of "Morrison's Pills." She continued to get worse, being violently affected; on the 22d, she became somewhat sensible, complaining of violent pains in the bowels; on the 23d all symptoms became aggravated, and she died on the evening of the same day. Witness concurs in the opinion of Dr. Johnson, that the death of the deceased was caused by inflammation of the intestines, brought on by the administration of some violent medicine. Sarah Paine, servant to the deceased, proved having purchased three separate boxes of "Morrison's Pills," at No. 43, Munster-street, which were taken by her mistress in doses of fourteen and sixteen at a time. Other relatives of the deceased were examined, who stated that the deceased was advised to take the pill by a Mrs. Robinson, a neighbour; but she (the deceased) becoming worse, they advised her not to take more. The jury severely reprimanded on the sale of the pills in question, and after some discussion returned a verdict, "That the deceased died from inflammation of the intestines, caused by taking Morrison's Pills."

All diseases arise from the one simple cause—an impurity in the blood, which impedes its circulation by settling on some organ or part, and immediately illness ensues. BRANDRETH'S PILLS correct, purify, and invigorate the blood, causing it to circulate freely; giving to every organ, healthy action. They are the Original Vegetable Medicine and have the highest claims on the patronage of a liberal and discerning Public; Dr. Brandreth, the original discoverer, not having decided on their present formula, until after thirty years' experience and laborious research into the medicinal properties of the numerous plants composing the Vegetable Kingdom: his object being to compose a pill that should at once purify and produce, by a specific action, an equalization of the circulating fluid; and whoever may feel disposed to give these Pills a trial, will, at once, find that this object is attained. They give immediate relief in all constipations of the bowels, spasmodic and bilious affections, flatulency, habitual costiveness, nervous and sick headache, arising from an overloaded condition of the digestive organs, viscera, &c., and the destruction of worms is speedily effected by them. Three or four weeks' use will eradicate scurvy, and all scorbutic humours, erysipelas, or St. Anthony's fire, and all cutaneous affections of the skin; and in diseases of the eyes, paralytic affections, asthma, dropsy, stone and gravel, piles, lumbago, affections of the kidneys, irritation of the bladder, urethra, rectum and spasmodic stricture, they are found invaluable. They also remove the innumerable train of evils to which females are subject at certain periods. Influenza is soon cured by these pills, and liability to it prevented. No mother of a family should be without a constant supply of this Domestic Medicine; they are most effective in their administration to children of the earliest age, when labouring under disease of any kind, especially hooping cough, dentition, measles, scarlet fever, chicken pox, worms, tinea capitis or scald head, and all other eruptive diseases. As a medicine, to all individuals afflicted with either rheumatism or gout, it is truly invaluable; it not only eradicates, but by regularly taking it once or twice a-week, it will, most assuredly, prevent a return. Captains and all voyagers will find this the medicine, without the aid of any other, to prevent costiveness, scurvy, and the various diseases incident to long voyages or foreign

HEALTH AND HAPPINESS.

"Methinks I've cast full twenty years aside,
And am again a boy. Every breath
Of air that trembles through the window bears
Unusual odour."
PROCTOR—"MIRANDOL."

IMPORTANT TO THE AFFLICTED.—The unprecedented success which has resulted from the adoption of Brandreth's Pills, during a period of upwards of 80 years—the numerous and extraordinary cures which they have performed upon hundreds of individuals whom they have rescued from almost inevitable death, after they had been pronounced incurable by the most eminent of the faculty—justify the proprietors of this Original Vegetable Universal Medicine in warmly and conscientiously recommending it to the especial notice of the public. Unlike numerous Medicines, of high pretensions and FATAL EFFECTS—the "kill or cure" nostrums of ignorant empirics—which are daily sent forth to gull and delude the public, these Pills may be taken with perfect safety by even children of the most tender years; the doses being regulated (for which see the Directions accompanying the Medicines) according to the age of the patient. Ignorant pretenders to the science of medicine, in order to increase the consumption of their deadly compounds recommend to their deluded victims doses in a dangerous and almost unlimited quantity!! The result of the overweening confidence of their doubly afflicted patients (who are thus induced to shorten their lives by taking their deadly advice, and swallowing their pills in these fatal quantities) may be traced in the verdicts of Coroners' Juries, who have publicly placed on record their opinions of the effects of Pills, composed of those highly dangerous ingredients, Gamboge and Bitter Aloes, by returning a verdict of manslaughter against the Vendors.

climates: it being unalterable by time or any atmospherical change. Brandreth's Pills are also a certain preventive of sea sickness, and are likewise the best medicine preparatory to sea bathing. After free living, three or four of these pills will prevent bilious attacks, and all unpleasant sensations.

THE TESTIMONIAL OF H. W. DEWHURST, Esq.

THEATRE OF ZOOLOGY, GOWER STREET, EUSTON SQUARE, LONDON, JAN. 10, 1834.

My Dear Sir,—As you have requested my candid opinion of your pills, I have much pleasure in stating, that when labouring under a serious illness in August 1831, I took them by your advice, and am happy to say, that their action was, in every way, all that I could desire; and, accordingly, from their use, I date my recovery. I consider them an excellent family medicine.

I remain, my dear Sir, yours truly,
H. W. DEWHURST, F. L. S.
Surgeon-Accoucheur, and Professor of Human and Zoological Anatomy, and Corr. Mem. Worces. Nat. Hist. Society.

From the OXFORD JOURNAL, Aug. 23, 1834.

BRANDRETH'S PILLS.—There are few who do not know that the essence of the food is converted into blood, which is formed, assimilates itself to the various ramifications of the human frame. We take it, therefore, as a clear axiom, that that medicine which makes the blood pure, without weakening the system, must be most excellent; and, as we know Brandreth's Pills to be such a medicine, we recommend them, with confidence, to our friends. Many and high are their testimonials.

From the OXFORD HERALD, August 23, 1834.

On all hands we hear of astonishing cures performed by Brandreth's Pills. Mr. Wilkins, of Magdalen College, was cured by them, of Ulcerated Legs in eleven weeks, which had been bad nine years. They cure by removing all noxious accumulations from the stomach and bowels, and all impurities from the blood, at the same time strengthening the frame: thus restoring the energies both of body and mind. We have ourselves taken them as an antibilious pill and can, from experience, recommend them as such to our numerous friends.

To be had of every respectable Medicine vendor in the colony in boxes, 2s.—4s.—6d.—18s. each.

NOTICE TO THE TRADE.

S. MORDAN & Co. beg to call the attention of the TRADE, and of the Public at large, to the following articles of their manufacture, viz:—

THE PATENT EVER-POINTED PENCIL is an instrument universally allowed to be of the greatest utility, and particularly recommended to the public, when made with that mathematical nicety on which its use depends. The Patentees inform the public that all Pencils having steel points are not of their make; and to avoid all inconvenience the following remarks on purchasing will ensure them a genuine article:—see the Pencil has the name, "S. Mordan and Co., Makers and Patentees," on the body of the case.

LEADS.—The spurious leads are a mixture of common lead-dust and antimony, and of all manner of sizes; they choke up the Pencil-case, and create an unjust prejudice against the genuine article. The proper leads for replenishing the case have on each box a yellow belt, with the word "warranted" on it, and a red sealing-wax impression, bearing the initials "S. M. & Co."

Shopkeepers in provincial towns would do well to observe the above remarks, to prevent their being imposed upon, the public being much inconvenienced in not being supplied with the genuine article.

CEDAR PENCILS.—Artists and others are particularly requested to try their Black Lead Pencils in Cedar, made from the pure Cumberland lead, selected with the greatest care; they have been pronounced, by the most competent judges of the day, the best extant. (See J. D. Harding's Work on Pencil Drawings.) This article is patronized by all the Government offices.

THE PATENT OBLIQUE PEN, the only straight Pen. This penitarily is owing to the slit being parallel to the angular slope of the writing, which gives it that freedom in use which is unequalled by any other pen by the direction in which both nibs are brought into use at the same time, the writ is not up rating upon one edge of the nib, and the contrary edge of the other, at the same instant, but upon the square surfaces or points of both together. Both nibs are thus brought into constantly equal wear, and a freedom is secured which no other metal Pen ever possessed. The Patent Oblique Pen is the most perfect I have ever used.

PATENT TRIPLE-POINTED PEN.—The peculiarity of this pen, either in its straight or oblique form, is the addition of a third nib, which secures the following advantages:—

1. A certain supply of ink of any kind, uniform with the most rapid writing.
2. The two nibs of the ordinary pen act only as dividers or tracers, while the third nib, pressing up in the paper, conducts and distributes the ink.
3. The third nib renders the same pen capable of writing the boldest text or finest running hand.
4. The third nib retains a larger supply of ink without risk of blotting. (See Laws of Fluids.)
5. The third nib, acting on the slit of the pen, effectually removes the fibres as they are gathered from the paper, thereby removing the greatest impediment to the use of metallic pens.
6. Firmness in use is obtained by the third nib; and at the same time the flexibility is increased, and durability necessarily follows.

* * * Use the Improved Joint Holder, made expressly for these Pens.

PORTABLE QUILL PENS.—There are many persons who do not like steel pens; to those the Portable Quill Pens, and Silver Penholder, are particularly recommended. In Boxes containing Fifty and One Hundred.

"S. M. & Co., Makers," are marked on each box, and are warranted, with a yellow belt and wax impression.

COOPER'S PATENT SCENT BOTTLES.—These articles are confidently recommended from their superiority. The advantages derived from this invention are, that the Stopper, from its spherical form, can neither stick, or break in the neck, so constituting a complaint against those on the old plan. The stopper being made of glass never corrodes. They are so perfectly air-tight that they will preserve the most volatile spirits, even ether or ammonia, any length of time. They cause much less trouble in use than any others, the act of removing the cap and stopper being only one operation. They are more durable than any others, from their superiority both in workmanship and material, the silver and gold used in them being very stout, and warranted standard.

Manufactured by S. Mordan & Co.

PATENT TRAVELLING INKS.—S. M. & Co. invite particular attention to their improved Travelling Inks, to which they have adapted the Patent Spherical Stopper, so as to secure all its advantages, while the construction of the case admits of

a glass holding a much larger quantity of ink than those in general use, without increasing its bulk; and at the same time it is protected by a strong case, neatly covered with leather. The improved Stoppers to these Inks remove the objections to the India Rubber Stoppers of the late Mr. Berry, and may be had in all the varieties made by him.

These Inks are also made in wood or ivory, for the pocket.

NEW FOUNTAIN INKSTANDS.—These Inkstands are of a very superior construction to those formerly in use. They present but a small surface of ink to the atmosphere, and comparatively no evaporation takes place; nor can dust accumulate to spoil the ink. The spout is placed at the most convenient angle for dipping the pen; and the ink being of a uniform depth, prevents the pen being spoiled by striking against the glass.

This Inkstand is peculiarly adapted for the writing fluids now in use. They are made of white or coloured glass, either plain or richly cut; and are also mounted with silver caps, which exclude the atmosphere or dust. Each Inkstand has a medalion, with the name S. Mordan & Co. London, on it.

SEVEN GUARDED LOCK.—There are few persons but have property of some kind to secure from prying curiosity or theft. No lock can be secure that has duplicate keys in existence, or that will allow of an impression being taken of the key to produce a facsimile, so easy in all warded and tumbler locks. The most serious robberies have taken place by means of duplicate keys, which allow the dishonest to relock without suspicion; this is fully borne out by the Police Reports. The only lock that gives positive security is the Seven Guarded Lock. The infinite variety of changes of which the key is susceptible, which causes every successive key to differ from all which have preceded it, makes this Lock perfectly secure. An inspection of the machine will justify this assertion.

This Lock is patronized by the Government offices; also at Newgate, Whitecross-street, and Warwck. There is scarcely a banking house in London but have these Locks more or less on their establishment.

Patent Joint Penholders, in Silver and Gold.
A new Guide Penholder, in Silver, much approved of.
Patent Parisian Spring Penholder, and Short Pens for do.
Gold Pens with Perpetual Points.
Fire-proof Deed-boxes, &c.
Iron Chests and Bookcases.
Iron Doors for Strong Rooms.
Lump Inks, Cone Inks, and Glass Inkstands of every description.

Toilet-bottles, Pastille-burners, Rose-water Bottles, &c.
Smelling-bottles, mounted in Silver and Gold, with S. M. and Co.'s Improved Conical Stopper.

Soda-water Machines, &c. &c.
S. M. & Co. also inform the Trade that they have now in the course of manufacture several entirely new and useful articles, which will be laid before them with all possible dispatch.

CAUTION.—As imitations have been made of many of their articles, observe, that each bears the name of S. Mordan and Co., Makers, London.

Manufactory, 22, CASTLE-STREET, near FINSBURY SQUARE, LONDON.

N.B.—S. MORDAN will be happy to advise persons taking out Patents for new inventions, as to the best mode of manufacturing and laying the same before the Trade.

N.B.—MANY of the above articles are kept ON SALE by Mr. A. S. ROBERTSON, of Cape Town, By whom ORDERS for any articles made by S. MORDAN will be received, and executed promptly.

COMMERCIAL RETROSPECT.—JANUARY 30, 1837.

The continued pressure for capital, arising out of a want of confidence, still prevents any improvement in the commercial markets; they have again been exceedingly dull, indeed even more so than the preceding week. Scarcely any speculation is going forward, and the transactions either for export or home consumption are very meagre, particularly for the former purpose, and prices of every commodity continue to decline, with the exception of the good clean grocery sorts of British Plantation and Ceylon Coffee, which, from the short stocks held in the hands of the trade, and the importers only bringing enough to market to meet the demand, support their value. Several mercantile failures have been announced since our last, but the extent of the liabilities arising therefrom have not been ascertained. These continued stoppages add much to the dullness of the markets, and occasion an increased want of confidence.

The Money market has been very dull this week and very destitute of interest. Prices of public securities were much too high for the Bank of England last week, and the Bank has been trying to pull them down and has succeeded. Last week Consols were 91½, this week they have been 89½, and they have been brought down by the rumour of the Bank being about to sell the dead weight, which we noticed last week. Upon this point, however, there is nothing decisive known; but the very rumour of such a matter is calculated to show that even the Bank itself has been affected by the late, and indeed by the present monetary unhingement, and it also goes to show that the monetary derangement is not yet over. While we fully admit this, we are still of opinion that matters will ultimately work themselves out into stability and order. In this progress there will be doubtless much suffering and perplexity, some of a public, but more of a private nature, and for some time to come it does not appear likely that business will feel its feet.

Bank Stock has also very considerably declined; indeed, its decline is the most striking trait in the Money market; from 210½, the price of last week, it has been down to 203½.—Exchequer Bills have been down to 20 22, but have since been 21 24. The transactions in English Securities have not been extensive, and Money has been scarce. Discounts on the best Bankers' Bills 5½, and other kinds of paper still continue to be very difficult to get into circulation on any terms. Bill Brokers appear afraid of Bills, and while they will not discount but on high terms, they will not give above 4 or 4½ per cent for money. Although there has been felt the pressure of a great scarcity of money, still there is a very large portion of unemployed capital, which its holders are perplexed to know what to do with. This is the present state of the Money market.

To-day Consols have been 89½.—Exchequer Bills 18 20.—Spanish Bonds 25½.—Portuguese 5 per cents 48, and Bank Stock 207.

STEAM COMMUNICATION WITH INDIA.

A week or two ago we called the attention of our readers to a very well digested statement of this great matter, in a pamphlet of one hundred pages, by Capt. MELVILLE GRINDLAY, from which we gave copious extracts. This able and comprehensive pamphlet, which states the precise position of the matter at this moment, by one who is thoroughly acquainted with it, he being the London agent to the steam committees of Calcutta and Madras, has, besides its maps and statements, an appendix, in which there is a great mass of authentic information on this subject, which could not be so well wrought into the body of the pamphlet. Anxious as we are that our readers, to all of whom steam communication with India is a matter so desirable to be secured, should give it aid when it is brought before Parliament, as it shortly will be, we shall labor to keep the matter before them. From this appendix we make the following extract from a petition signed by the inhabitants of CALCUTTA and its neighbourhood, and which petition is to be presented to parliament by Lord Wm. C. Bentinck, M.P.

"Your petitioners learn therefore with the utmost satisfaction that a select committee of your Honorable House had resolved, under date 14th July, 1834—

"That a regular and expeditious communication with India by means of steam vessels, is an object of great importance, both to Great Britain and India. That it is expedient that measures should be immediately taken for the regular establishment of steam communication with India by the Red Sea. That it be left to His Majesty's government, in conjunction with the East India Company, to consider whether the communication should be, in the first instance, from Bombay, or from Calcutta, or according to the combined plan suggested by the Bengal steam committee; and that by whatever line the communication be established, the net charge should be divided equally between His Majesty's government and the E.I. Comy."

From a Memorial to the India Board, passed at a public meeting of the said inhabitants of Calcutta, on March 5, 1836, we detach the following:

"That your memorialists beg respectfully to press upon the consideration of His Majesty's government, through your Right Honourable Board, the vast importance of speedily following up the recommendation of the House of Commons, by establishing a regular and expeditious communication between this country and Great Britain, by means of steam vessels, by way of the Red Sea; and on this point your memorialists beg to be permitted to lay before your Right Honourable Board the following expression of the testimony of the Right Honourable Lord William Cavendish Bentinck, the late Governor General of India, made on the eve of his departure for England.

"I have been a zealous supporter of the cause of steam communication with Europe from the strongest conviction confirmed by every day's further reflection, of its vast importance to innumerable interests, both national and commercial. I cannot command the opportunity of forwarding its future success, but if within my reach, you may depend upon my most earnest efforts to promote its progress, and to obtain for India an advantage so great in all its direct and indirect consequences, that in my opinion it would be cheaply bought at any price."

"That your memorialists deem it proper to bring to the notice of your Right Honourable Board, that the average number of letters received from England and despatched thither in India through the Post Offices annually may be taken as follows:—

	Recd.	Despatched
Calcutta, on an average of 5 years	98189	72397
Madras, on an average of years	31306	40614
Bombay, from a note of the Post Master General	30000	24000
Galle, the number received not known, but say	6300	
The number despatched is from official reports,		6505
	156493	143516

Together, 3000011

"That the average annual amounts of mercantile transactions with Europe at the above places, were on an average of three years, viz. 1829-30 to 1831-32 as follows:—

Calcutta	R. 3,79,49,681
Madras	59,10,012
Bombay	1,63,89,629
Ceylon	11,88,007

Together 6,23,37,359

"That the average number of passengers annually arriving at, and departing from, the undermentioned places, may be taken as follows:—

	Arrivals	Departures
Calcutta	767	663
Madras	570	459
Bombay	297	315
Ceylon	55	17

"And your memorialists respectfully draw the particular attention of your Right Honourable Board, to the above statement regarding passengers; because the committee of merchants of Calcutta, who made a tender to the government here to establish, on certain terms, a regular communication, by way of the Red Sea, with Great Britain, by means of steam vessels, gave it with their opinion, after very full and minute investigation, that the communication must depend, in a material degree, upon the support of passengers, for paying its expenses."

The pamphlet from which these extracts are taken, is published by Messrs. Smith, Elder & Co., Cornhill.

COFFEE is sold in bond; the business is done in the public market, either by public sale or private contract. The terms are—E.I. and W.I. British Plantation, 1 month, 1 per cent. discount, allowing 4 per cent for cash; East India at a prompt of three months from the day of sale without discount; Foreign 1 month, 2½ per cent. discount, and 4 per cent. for cash. The rates are the same as allowed by the Revenue. The draft on B.P., namely, cask of 5 cwt and upwards 5 lbs; under 5 cwt 4 lbs; barrels and bags 2 lbs; Foreign and East India 1 lb.

SUGAR.—Such as Jamaica, Demerara, and other British Plantation are generally sold by private contract in the public market, duty paid. East India, say Bengal, at the East India Sale, in bond. Foreign such as Havannah, Brazil, & Siam, in bond for exportation sometimes, by public sale. The Merchants pay the duty, but the Refiners recover a drawback on the exportation of the manufactured article of 36s 9d on single and 43s 2d on double refined. The tare allowed on British Plantation Sugar is as follows, viz.: casks under 8 cwt. 1½ lb, under 9 cwt. 1 cwt. 7 lb, under 7 cwt. 10 cwt. 1½ lb, under 11 cwt. 1 qr., increasing 7 lb for every additional hundred weight. The draft 2 lb per hhd, and 11 lbs. per tierce. The terms are two months prompt, or 4 per cent. per annum allowed for cash. East India Sugar, 3 months. No discount.

WINE.—(Duty on Cape 2s. 9d; other Foreign 5s. 6d. per Gall. In cases 13s. 8d. bottles included.)

TOBACCO sold in bond, may be imported and manufactured for 5 years, at an expense of only 4s. per hhd., and re-shipped without paying any duty, subject to an allowance of shrinkage from the seller to the buyer of 30 lb per hhd, on Virginia and Kentucky, and 15 lb. per hhd, on Maryland on the landing weights; the draft of the former 8 lb, and the latter 4 lb, with a tret on all sorts of 4 lb. per 104 lb. When taken out for Home Consumption pays a duty of 3s. per lb. (2s. 9d B.P.) with the same allowances of draft and tret as for exportation, but the duty is charged on the nett weight. Manufactured Tobacco or Segars pays a duty of 9s per lb.

SUGAR.—MAURITIUS, Jan. 31.—At public sale 2220 bags were brought forward, and all sold, but in most cases at 6d to 1s per cwt. under the last sale; good bright yellow at 57s to 60s, colory at 61s to 62s 6d, and washed at 56s to 57s 6d per cwt.

The stock of Mauritius is 30,312 bags, against 52,058 at the same time last year, thus showing a decrease of 21,746 bags; the weekly deliveries are 3,190 bags, against 5217 last year.—These returns include the East India Dock Company.

COFFEE.—The public sales to-day comprised 562 bags Ceylon admissible, at the same rate of duty as West India, and 683 bags Brazil: the former went off at full prices; good ordinary at 68s 6d to 70s per cwt. The Brazil only partly found buyers, but at fully former rates; good ordinary colory mixed at 49s 6d to 50s 6d, ordinary was bought in at 48s per cwt. British Plantation descriptions were unvaried.

The present stock of British Plantation Coffee is 3796 casks and 2496 barrels and bags, against 2911 casks and 1749 barrels and bags at the corresponding period of last year; thus showing an increase of 885 casks and 747 barrels and bags.—The deliveries last week were 232 casks and 255 barrels and bags against 171 casks and 270 barrels and bags at the same time last year.

TEA.—The Tea sales commenced yesterday—about 26,000 packages have passed auction, of these not more than 4000 have found buyers, the biddings were extremely languid, except for fine Congous; the following variations may be quoted, Common Congous 1½d per lb lower, Blackish Leaf kinds 1d per lb dearer; Twankay's 6d per lb cheaper; Hysons fully as low as last sale; in Boheas no transactions, they being all bought in at 10½d to 1s 1d per lb for Fokien.

WOOL.—The public sales of Colonial Wool which commenced yesterday at night and finished last night, comprised 4014 bales N. S. Wales and V. D. Land Wool. The sales generally have gone off with heaviness, which may partly be attributed to the depressed state of the money market, and partly to the Wools being mostly of low and inferior quality, with but few combing Wools; the biddings were very languid and some portion was bought in. The prices ruled 2d to 3d per lb. lower for the clothing Wools than the last public sales, but the better combing flocks have been rather better supported, and rule 1d. to 2d per lb. lower.—[We hope that our Cape Growers always look well to the Quality of their Fleece. It is of more consequence than QUANTITY.]

OILS.—All kinds of common Fish are still dull and the limited transactions are at rather lower prices, Pale Seal has sold at £5 4 10s. and brown at £5, and Cod at £4 7 10s. per tun. Spermaceti continues in demand, and as the quantity here is small and in few hands, prices continue gradually to improve. Palm is dull of sale and may be purchased rather cheaper. Rape has only been in limited request, and the prices have given way 6d. to 1s. per cwt. Linseed has become quiet; and there are sellers at 36s. 6d. per cwt.

TALLOW. The market for Petersburg Yellow Candle is firm at 45s. to 45s. 3d. per cwt. on the spot, at which however the business doing continues to be only to a limited extent and mostly for the immediate wants of the home trade.

The following Peerage creations are published in the *Gazette* of last night:—Lord Howard of Effingham to be created Earl of Effingham; Lord Ducie to be created Earl of Ducie and Baron Moreton; Lord Yarborough to be created Earl of Yarborough, and Baron Worsley; Edward Berkeley Portman, Esq., to be created Baron Portman; Thomas Alexander Fraser, of Lovat, Esq., to be created Baron Lovat; William Hanbury, Esq., to be created Baron Bateman, of Shobden, county of Hereford.—Jan. 25.
